PROFESSIONAL SUMMARY

System Development IT student specializing in web development, with a strong focus on engineering responsive, scalable web applications. Technically skilled in modern web technologies including HTML, CSS, JavaScript/TypeScript, and React, supported by backend proficiency in Node.js, Django, and FastAPI. Experienced in architecting complete web ecosystems by seamlessly integrating RESTful APIs, AI capabilities, blockchain networks, and secure authentication. A versatile problem-solver who has successfully developed seven comprehensive web-based software projects across the decentralized finance (DeFi), educational technology, financial intelligence, and personal productivity sectors.

EDUCATION

PHINMA-University of Pangasinan

Bachelor of Science in Information Technology Major in System Development

2023–Expected 2027

Dagupan City, Pangasinan

SELECTED PROJECT EXPERIENCE

Avelon – Decentralized Lending Platform

Project Manager | 2026

- Built the front-end experience for a decentralized finance (DeFi) application using React and React Native, delivering a highly responsive interface that streamlined automated KYC verification and user onboarding.
- Connected seamless client-side data pipelines to Node.js and FastAPI backends, ensuring the UI accurately reflected real-time machine learning-driven risk assessments.
- Implemented intuitive user-facing components for Ethereum smart contracts, transforming complex blockchain operations into an accessible, real-time collateral tracking dashboard.

PHINMA Education Wide Evaluation System (SFF & COPUS)

Front-End Developer | 2025

- Built the complete student-facing web interface, creating a smooth and accessible portal for users to easily select academic periods and submit detailed instructor evaluations.
- Designed and tested comprehensive front-end administrative dashboards for HR, IT, Deans, and Active Learning Coaches, organizing complex user management and system configurations into clear, intuitive layouts.
- Improved the overall UI and user experience across the platform, utilizing Vite to deliver a fast, responsive multi-campus system with interactive analytics and classroom observation (COPUS) tracking.

AnchorWatch – AI-Powered Stablecoin Financial Intelligence Platform

Front-End Developer | 2025

- Enhanced the front-end design of the financial intelligence platform by refining web and mobile interfaces using React, TypeScript, and Flutter, delivering a more intuitive layout for real-time stablecoin monitoring.
- Tested cross-platform client-side features to identify and resolve UI bugs, ensuring that complex, LLM-powered market analytics rendered accurately and responsively across different devices.
- Optimized existing front-end web components and data visualization elements, improving the overall stability and smoothness of the user dashboard when interacting with high-frequency financial data.

BrightSteps – Blockchain-Integrated Mobile Lending App

Front-End Developer | 2025

- Awards: Winner of Best Web Development Project, Best App Development Project, and Best UI/UX Design.
- Built the web front-end for a cross-border micro-lending platform using HTML, CSS, and PHP, ensuring a smooth and responsive experience for users.
- Designed intuitive web user flows for secure cross-border transactions, easily connecting the user-facing site to an administrative PHP and MySQL backend.
- Added Ethereum wallet connectivity directly into the web application, providing a clear and easy-to-use interface for executing blockchain-verified smart contracts.

ADDITIONAL PROJECTS

ReviewKita | *Front-End Developer* – AI-powered educational web application featuring note uploads, AI-summary generation, and gamified quizzes.

PuTask | *Back-End Developer* – Personal task management and productivity analytics Android application featuring an advanced dashboard and customizable tracking categories.

Lurk | *Game Developer* – 3D first-person horror game in Unity featuring interactive environments, enemy behavior, and a blockchain-based in-game shop.

CERTIFICATION

AWS Fundamentals

May 2026

Including Amazon EC2, database management using Amazon DynamoDB, application deployment, Amazon S3 object storage and static website hosting, AWS Lambda, API Gateway, and serverless deployment in AWS.

Zuitt Learning Institute Incorporated

The Next Generation of Builders: Empowering Youth to Create Bias-Aware AI

August 2025

University of the Philippines ISC

Programming and Logic Design Workshop

August 2025

Campus DEVCON Cagayan De Oro

TECHNICAL SKILLS

Languages: HTML, Java, CSS, Kotlin, TypeScript, JavaScript, Python, PHP

Frameworks: Flutter, React, Tailwind, Django, Vite, Laravel, Chart.js, Compose Multiplatform

Databases: MySQL, MongoDB

Tools: Git, GitHub, Postman, Figma, VS Code, Google Cloud, Unity

Concepts: Software Development, Web Development, UI/UX, Data Analysis
