

Setup Manual

How to Run:

- Frontend

```
○ 1. Install dependencies:
○ ```bash
○ npm install
○ ```
○
○ 2. Create env file:
○ ```bash
○ cp .env.example .env
○ ```
○
○ 3. Set backend URL in `.env`:
○ ```bash
○ VITE_API_BASE_URL=http://127.0.0.1:8000
○ ```
○
○ 4. Run dev server:
○ ```bash
○ npm run dev
○ ```
○
○ ## Build
○
○ ```bash
○ npm run build
○ ```
○
○ ## Production Readiness Audit
○
○ - `docs/PRODUCTION_READINESS_AUDIT.md`
```

```
○  
○ ## Notes  
○  
○ - API base URL is required via `VITE_API_BASE_URL`.  
○ - Local env files are gitignored (`.env`, `.env.*`), except  
  `.env.example`.
```

● Backend

```
○ # How to Run  
○  
○ ## Prerequisites  
○  
○ - Python 3.10+  
○ - PostgreSQL (running)  
○ - Redis (running)  
○  
○ ---  
○  
○ ## Local Development  
○  
○ ### 1. Setup  
○  
○ ```bash  
○ # Create and activate virtual environment  
○ python -m venv .venv  
○ source venv/bin/activate          # macOS/Linux  
○ # .venv\Scripts\activate          # Windows  
○  
○ # Install dependencies  
○ pip install -r requirements.txt  
○  
○ # Create database  
○ psql -U postgres -c "CREATE DATABASE phinma_wide;"  
○
```

```

o # Run migrations
o cd phinma_wide
o python manage.py makemigrations
o python manage.py migrate
o ```
o
o
o ### 2. Environment Variables
o
o Create `.env` in project root:
o
o ```env
o DB_PASSWORD=your_postgres_password
o EMAIL_HOST_USER=your_email@gmail.com # Optional: for
password reset
o EMAIL_HOST_PASSWORD=your_app_password # Optional: for
password reset
o ```
o
o
o ### 3. Run All Services
o
o Open 3 terminals:
o
o ```bash
o # Terminal 1: Redis
o redis-server
o
o # Terminal 2: Celery Worker
o cd phinma_wide
o celery -A phinma_wide worker --loglevel=info
o
o # Terminal 3: Django
o cd phinma_wide
o python manage.py runserver
o ```
o
o

```

```
o API available at: `http://localhost:8000`
o
o ---
o
o ## Production Configuration
o
o All production settings are now configured via environment
o variables in `.env`.
o
o >  **No code changes needed** - `settings.py` automatically
o uses env vars when set, and falls back to dev defaults
o otherwise.
o
o ### Production Environment Variables
o
o ```env
o # Django Security
o DJANGO_SECRET_KEY=your-production-secret-key
o DEBUG=False
o ALLOWED_HOSTS=api.yourdomain.com
o
o # Database
o DB_NAME=phinma_wide_prod
o DB_USER=prod_user
o DB_PASSWORD=secure_password
o DB_HOST=your-db-host.com
o DB_PORT=5432
o
o # Redis
o REDIS_URL=redis://your-redis-host:6379
o
o # Email
o EMAIL_HOST_USER=noreply@yourdomain.com
o EMAIL_HOST_PASSWORD=your_smtp_password
o ```
o
```

```
o   ### Run Seeders (First Time Only)
o
o   ```bash
o   cd phinma_wide
o   python manage.py production_seeder
o   ```
o
o   For detailed production deployment, see
o   **PRODUCTION\_NOTE.md**.
```

Steps:

1. Run the super_admin_seeder to initialize and access the Super Admin account.
2. Log in as the Super Admin.
3. Create a Campus, then proceed to set up the IT Department.
4. Log in to the IT Department account.
5. Create HR accounts, student profiles, and subject entries.
6. Log in to the HR account.
7. Create teacher profiles, program heads, deans, and ALCs (Active Learning Coordinators).
8. Log back into the IT Department account.
9. Enlist subjects to students to automatically display their enrolled subjects in the student view.
10. Once setup is complete, SFF (Student Feedback Form), SR (Supervisor Rating), and COPUS Analytics become accessible to Deans, Program Heads, and ALCs for monitoring and evaluation.

System Pages

Human Resources Pages

Figure 1.0 Human Resources Dashboard Page

The Human Resources Dashboard serves as a centralized interface for managing institutional staff, offering a clear overview of employee distribution and quick access to role-specific data. At the top, users are greeted with key statistics such as total employees, number of teachers, departments, and admin roles, providing a snapshot of the organization's structure. Below that, the welcome section highlights leadership roles including Deans, Program Heads, ALCs, and Teachers, helping users monitor role coverage across the institution. The Quick Stats panel reinforces these figures for easy reference, while the Departments section lists active academic units like the College of Information Technology Education. On the right, the

Recent Activity feed logs updates such as newly added Deans, complete with timestamps for tracking changes. Navigation is streamlined through a sidebar that links to dedicated pages for Teachers, Feedback Completion, Program Heads, ALCs, and Deans, allowing users to manage each category efficiently. At the bottom, the footer includes logout functionality, a session ID, and versioning info to ensure secure and traceable access. To use the dashboard effectively, start by reviewing the top-level stats, then navigate through the sidebar to manage specific roles or monitor feedback. Use the activity log to verify recent updates, and always log out after use to maintain data security. This layout ensures HR personnel can make informed decisions quickly while maintaining a clear view of institutional staffing.

Figure 2.0 Teacher Management Page

The Teacher Management page within the PHINMA HR system provides a streamlined interface for managing faculty records across the campus. At the top of the page, users are presented with three key actions: adding a single teacher, registering multiple teachers in bulk via CSV upload, and exporting the current teacher list as a CSV file. These options allow HR personnel to efficiently maintain updated records. The main panel displays a searchable table listing all registered teachers, showing essential details such as Teacher ID, full name, department, employment type, and creation date. Each row includes “Edit” and “Delete” buttons for modifying or removing individual records. All teachers shown belong to the College of Information Technology Education and are marked as full-time employees, with a uniform creation date of December 12, 2025. Users can search by teacher name using the input field above the table, and the total number of teachers is clearly indicated. A “Delete Selected” button

is also available for batch deletion. Navigation is handled via the sidebar, which links to other HR modules including Dashboard, Feedback Completion, Program Heads, ALCs, Deans, and the main Human Resources section. The footer includes logout functionality, a session ID, and system versioning for secure access. To use this page effectively, HR staff should begin by reviewing the current teacher list, use the search bar to locate specific entries, and apply the appropriate action buttons to update or remove records. For bulk operations, CSV import and export tools are readily accessible, ensuring smooth data handling and institutional consistency.

Figure 2.1 Add Singular Teacher

The Add Single Teacher feature in the PHINMA HR Teacher Management page allows HR staff to manually register individual teachers with ease. Users simply fill out the form fields including User ID, First Name, Middle Name, Last Name, College Department, and Employment Type. Required fields are clearly marked, and dropdowns ensure consistent data entry. Once completed, clicking “Create Teacher” adds the new record to the system, which then appears in the teacher list below. This feature is ideal for onboarding one teacher at a time without needing bulk uploads or CSV files

Figure 2.2 Bulk Teacher Registration

The Bulk Teacher Registration feature in the PHINMA HR Teacher Management page is designed to simplify the process of adding multiple teachers at once. HR staff can manually input teacher details or upload a CSV file containing the required columns: teacher ID, first name, middle name, last name, college department, and employment type. This method is ideal for onboarding large batches of faculty efficiently, especially during semester transitions or mass hiring periods. Once uploaded, the system automatically populates the teacher list, which can be reviewed, edited, or exported as needed.

Figure 2.3 After Adding CSV Teacher File

After uploading the CSV file, the Bulk Teacher Registration panel displays a preview of all loaded entries, showing each teacher's ID, name, department, and employment type. Once verified, users can click "Register All Teachers" to finalize the batch registration. This step confirms that the system has successfully read the file and is ready to commit all entries in one click, streamlining mass onboarding with minimal manual effort

Figure 2.4 Delete Feature

The Delete Teacher feature in PHINMA HR allows users to remove teacher records either individually or in bulk. For single deletions, each teacher row includes a Delete button, which opens a confirmation modal to ensure the action is intentional. For multiple deletions, users can select several teachers from the list and click Delete Selected, triggering a modal that lists all selected names and departments. The system clearly warns that this action is permanent and cannot be undone, helping prevent accidental data loss.

Figure 2.5 Edit Teacher Information

The Edit Teacher feature in PHINMA HR allows users to update existing teacher records with ease. By clicking the Edit button beside a teacher’s name, a modal window opens showing pre-filled fields such as Last Name, First Name, Middle Name, Department, and Employment Type. Users can make necessary changes and click Save to apply updates. This feature ensures that HR staff can quickly correct or revise teacher details without navigating away from the main list, maintaining data accuracy and workflow efficiency.

Figure 2.6 Recent Teachers Table

The Recent Teachers table in PHINMA HR provides a quick view of the most recently added faculty members. It displays essential details such as Teacher ID, full name, department, and date of entry, allowing HR staff to verify new registrations at a glance. This section is especially useful for tracking recent onboarding activity and ensuring that newly added teachers are correctly listed and categorized.

Figure 3.0 Program Head Management Page

The Program Head Management page in PHINMA HR is designed to give HR staff full control over managing program head administrators within the campus. At the top of the interface, users can choose to add a single program head by manually filling out details such as User ID, Full Name, Email, and Department, or they can register multiple program heads at once using the bulk registration option, which supports CSV uploads for faster onboarding. The system also provides an Export CSV button to download the current list for reporting or backup purposes, and a Delete Selected option for removing multiple entries in one action. The main table displays all registered program heads, showing their User ID, name, email, department, and creation date, with Edit and Delete buttons available for managing individual records. A search bar makes it easy to locate specific program heads quickly, while the sidebar navigation allows users to move between other HR modules such as Teachers, Feedback Completion, ALCs, and

Deans. This page ensures that HR personnel can efficiently add, update, and monitor program head assignments while keeping records accurate and accessible.

Figure 3.1 Add Singular Program Head

The Add Single Program Head feature in PHINMA HR allows HR staff to manually register a program head by filling out key fields such as User ID, Full Name, Email, Password, and College Department. Once the form is completed, clicking Create Program Head adds the entry to the system. This feature is ideal for onboarding one administrator at a time with full control over individual details.

Figure 3.2 Bulk Program Head Registration

The Bulk Program Head Registration feature in PHINMA HR allows HR staff to onboard multiple program heads efficiently using a CSV upload. Users can drag and drop a CSV file containing required columns such as user ID, first name, middle name, last name, email, college department, and optionally a password. Once uploaded, the system previews the entries and enables batch registration with a single click. This feature is ideal for mass onboarding during academic transitions, ensuring consistent data entry and saving time compared to manual input.

Figure 3.3 After Adding CSV Program Head File

After uploading the CSV file, the Bulk Program Head Registration panel displays all loaded entries, showing each program head's user ID, name, email, and department. Once verified, users can click "Register All Program Heads" to finalize the batch registration. This step confirms that the system has successfully read the file and is ready to commit all entries in one click, streamlining mass onboarding while ensuring accuracy and consistency.

Figure 3.4 Edit Program Head

The Edit Program Head feature in PHINMA HR allows HR staff to update existing program head records with precision and ease. By clicking the Edit button next to a program head's entry, a modal window opens showing editable fields such as User ID, Full Name, Email, Password, and Department. The form is pre-filled with current data, making it simple to revise only the necessary details. Users can leave the password field blank to retain the existing one, and once changes are made, clicking Save updates the record instantly. This feature ensures accurate data maintenance while keeping the workflow smooth and secure.

Figure 3.5 Delete Singular Program Head

The Delete Program Head feature in PHINMA HR allows HR staff to permanently remove individual program head records from the system. When the Delete button is clicked next to a specific entry, a confirmation dialog appears showing the full name and department of the selected program head. The modal clearly warns that this action is irreversible, helping prevent accidental deletions. Once confirmed, the record is deleted instantly, ensuring clean and accurate data management for campus administrators.

Figure 3.6 Delete Multiple Program Head

The Delete Multiple Program Heads feature in PHINMA HR allows HR staff to remove several program head records at once with a single action. After selecting multiple entries from the list, clicking Delete Selected opens a confirmation dialog that displays the names and departments of all selected program heads. The modal clearly states that this action is permanent and cannot be undone, helping prevent accidental data loss. Once confirmed, all selected records are deleted instantly, making it easy to clean up outdated or incorrect entries in bulk.

Figure 3.7 Recent Program Head Table

The Recent Program Heads table in PHINMA HR provides a quick summary of the most recently added program head administrators. It displays essential details such as User ID, Full Name, Email, Department, and Created Date, allowing HR staff to verify new entries at a glance. This section is especially useful for tracking recent onboarding activity and ensuring that newly registered program heads are correctly listed and categorized.

Figure 4.0 Active Learning Coach Management Page

The Active Learning Coach Dashboard in PHINMA HR is designed to help HR staff manage ALC administrators across various departments within the campus. At the top of the interface, users can choose to add a single ALC manually or register multiple ALCs in bulk using a CSV upload, making it easy to onboard individuals or entire batches. The dashboard also includes an Export CSV button for downloading the current list of ALCs, and a Delete Selected option for removing multiple entries at once. The main table displays all registered ALCs with details such as User ID, Full Name, Email, Department, and Created Date, along with Edit and Delete buttons for managing each record. A search bar allows users to quickly locate specific ALCs by User ID, and the sidebar provides navigation to other HR modules like Teachers, Program Heads, and Deans. This page ensures that HR personnel can efficiently add, update, and monitor ALC assignments while maintaining clean and organized records.

Figure 4.1 Add Singular ALC

The Add Single ALC feature in the Active Learning Coach Dashboard of PHINMA HR allows HR staff to manually register an individual ALC administrator. Users simply fill out the form with details such as User ID, Full Name, Email, Password, and College Department. Once the fields are completed, clicking the Create ALC button adds the entry to the system instantly. This feature is ideal for onboarding one ALC at a time with full control over their credentials and department assignment.

Figure 4.2 Bulk ALC Registration

The Bulk ALC Registration feature in the Active Learning Coach Dashboard of PHINMA HR allows HR staff to onboard multiple ALC administrators efficiently using a CSV file. Users can manually input entries or drag and drop a CSV containing required columns like user ID, first name, middle name, last name, email, and college department. Once uploaded, the system previews the entries and enables batch registration with a single click. This streamlines mass onboarding, reduces manual effort, and ensures consistent data entry across departments.

Figure 4.3 After Adding CSV ALC

After uploading the CSV file, the Bulk ALC Registration panel displays all loaded entries, showing each ALC’s user ID, name, email, department, and optional password field. Once verified, users can click “Register All ALCs” to finalize the batch registration. This confirms that the system has successfully processed the file and is ready to onboard all entries in one go, making mass registration fast, accurate, and hassle-free.

The screenshot displays the PHINMA HR system interface. On the left is a sidebar with navigation links: Dashboard, Teachers, Feedback Completion, Program Heads, ACLs, and Deans. The main content area is divided into two sections. The top section is a form for creating or editing an Active Learning Coach (ALC), with fields for Middle Name, Last Name, Email, Password, and College Department. The bottom section is a table listing existing ALCs. A modal window titled 'Edit Active Learning Coach' is open, showing pre-filled details for an ALC named 'alcify alc' with email 'alc0050@gmail.com'. The modal includes fields for First Name, Middle Name, Last Name, Email, Password, and Department, along with 'Cancel' and 'Save' buttons.

Figure 4.4 Edit Active Learning Coach

The Edit ALC feature in the Active Learning Coach Dashboard of PHINMA HR allows HR staff to update the details of an existing ALC administrator. By clicking the Edit button beside an entry, a modal window opens with pre-filled fields such as First Name, Middle Name, Last Name, Email, Password, and Department. Users can modify any of these details and leave the password field blank to retain the current one. Once changes are made, clicking Save updates the record instantly, ensuring accurate and up-to-date personnel information.

Figure 4.5 Delete Singular ALC

The Delete ALC feature in the Active Learning Coach Dashboard of PHINMA HR allows HR staff to permanently remove an individual ALC administrator from the system. When the Delete button is clicked beside a specific entry, a confirmation modal appears showing the ALC's full name, user ID, email, and department. The dialog clearly warns that the action is irreversible, helping prevent accidental deletions. Once confirmed, the selected ALC record is deleted instantly, ensuring clean and accurate personnel data.

Figure 4.6 Delete Multiple ALC

The Delete Multiple ALCs feature in the Active Learning Coach Dashboard of PHINMA HR allows HR staff to remove several ALC administrator records at once. After selecting multiple entries from the list, clicking Delete Selected opens a confirmation modal that displays the names and user IDs of all selected ALCs. The dialog clearly states that the action is permanent and cannot be undone, helping prevent accidental bulk deletions. Once confirmed, all selected records are deleted instantly, making it easy to clean up outdated or incorrect entries efficiently.

Figure 4.7 Recent ALC Table

The Recent Active Learning Coaches table in PHINMA HR provides a quick snapshot of the latest ALC administrators added to the system. It displays key details such as User ID, Full Name, Email, Department, and Created Date, allowing HR staff to verify recent registrations at a glance. This section is especially useful for tracking onboarding activity and confirming that newly added ALCs are properly listed and categorized.

Figure 5.0 Dean Management Page

The Dean Dashboard in PHINMA HR is designed to help HR staff manage dean-level administrators across various departments and campuses. At the top of the interface, users can choose to add a single dean manually or register multiple deans in bulk using a CSV upload, making it easy to onboard individuals or entire batches. The dashboard includes a search bar for quickly locating specific deans by User ID, and an Export CSV button for downloading the current list for reporting or backup purposes. The main table displays all registered deans with detailed columns for User ID, First Name, Middle Name, Last Name, Email, Department, and Campus, along with Edit and Delete buttons for managing each record. Users can also select multiple entries and use the Delete Selected option to remove them in bulk. The sidebar provides navigation to other HR modules such as Teachers, Program Heads, and Active Learning

Coaches. This page ensures that HR personnel can efficiently add, update, and monitor dean assignments while maintaining organized and accurate records across campuses.

Figure 5.1 Add Singular Dean

The Add Single Dean feature in the Dean Dashboard of PHINMA HR allows HR staff to manually register a dean for a specific college department. Users fill out a form with required fields such as User ID, First Name, Last Name, Email, Password, and College Department, with optional input for Middle Name. Once completed, clicking the Create Dean button adds the entry to the system instantly. This feature is ideal for onboarding individual deans with full control over their credentials and department assignment.

Figure 5.2 Add Bulk Dean Registration

The Bulk Dean Registration feature in the Dean Dashboard of PHINMA HR allows HR staff to onboard multiple deans efficiently using a CSV file or manual row entries. Users can drag and drop a CSV containing required columns—user ID, first name, middle name, last name, email, and college department—or add rows directly within the interface. Once the data is loaded and reviewed, clicking “Register All Deans” finalizes the batch registration in one go. This streamlines mass onboarding, reduces manual input, and ensures consistent data entry across departments and campuses.

Figure 5.3 After Adding CSV Dean

After uploading the CSV file, the Bulk Dean Registration panel displays all loaded entries, showing each dean’s user ID, name, email, department, and password field. Once the data is reviewed and confirmed, users can click “Register All Deans” to finalize the batch registration. This step ensures that the system has successfully parsed the file and is ready to onboard all entries in one go, streamlining mass registration while maintaining accuracy and consistency across departments.

Figure 5.4 Delete Singular Dean

The Delete Dean feature in the Dean Dashboard of PHINMA HR allows HR staff to permanently remove an individual dean's record from the system. When the Delete button is clicked beside a specific entry, a confirmation modal appears showing the dean's full name and department. The dialog clearly warns that this action is irreversible, helping prevent accidental deletions. Once confirmed, the selected dean is deleted instantly, ensuring clean and accurate personnel data across departments.

Figure 5.5 Delete Multiple Dean

The Delete Multiple Deans feature in the Dean Dashboard of PHINMA HR enables HR staff to remove several dean records at once. After selecting multiple entries, clicking Delete Selected opens a confirmation modal listing the full names and departments of all selected deans. The dialog clearly warns that this action is permanent and cannot be undone, helping prevent accidental bulk deletions. Once confirmed, all selected records are deleted instantly, streamlining data cleanup and ensuring accurate personnel records across departments.

Figure 5.6 Edit Dean

The Edit Dean feature in the Dean Dashboard of PHINMA HR allows HR staff to update the details of an existing dean record. By clicking the Edit button next to a dean's entry, a modal window opens with pre-filled fields including User ID, First Name, Middle Name, Last Name, Email, and Department. Users can make necessary changes and click Save to apply updates instantly. This ensures that dean profiles remain accurate and up to date across all campus departments.

Figure 5.7 Recent Deans Table

The Recent Deans table in PHINMA HR provides a quick overview of the latest dean registrations across campus departments. It displays essential details such as User ID, Full Name, Email, Department, and Created Date, allowing HR staff to verify and track recent onboarding activity at a glance. This section is especially useful for confirming that newly added deans are properly listed and categorized, ensuring up-to-date personnel records for administrative oversight.

Figure 6.0 Human Resources Logout

The Logout feature in the PHINMA HR dashboard ensures secure exit from the system after HR tasks are completed. When clicked, it triggers a confirmation dialog asking, “Are you sure you want to logout?” with Cancel and Confirm options. This extra step helps prevent accidental logouts and protects sensitive HR data by ensuring that only intentional exits are processed. Once confirmed, the user is safely signed out of the platform.

IT Departments Pages

Figure 7.0 IT Department Dashboard

The IT Department Dashboard in PHINMA HR is designed to help administrators manage IT personnel records with clarity and control. On the left sidebar, users can navigate between modules such as Departments, Programs, Subjects, Enlisted Subjects, Human Resources, and Campus Configuration. The main panel features tools for adding IT staff either individually or in bulk, making onboarding flexible and efficient. Each entry displays key details like User ID, Full Name, Email, and includes Edit and Delete buttons for quick updates or removals. Below the main list, the Recent IT Management section highlights the latest additions, complete with creation dates for easy tracking. This layout ensures users can monitor, modify, and maintain IT records with precision, while the footer confirms the logged-in user's identity and institution for accountability.

Figure 7.1 Add Singular IT Department User

The Add Single IT Department Member feature in the PHINMA HR IT Dashboard allows administrators to manually register an individual IT staff member. Users simply fill out the form with required fields such as User ID, First Name, Last Name, Email, and optionally Middle Name. Once completed, clicking the Create IT Department Member button instantly adds the entry to the system. This feature is ideal for onboarding one person at a time with full control over their credentials and departmental assignment.

Figure 7.2 Add Bulk IT Department Users

The Bulk IT Department Registration feature in the PHINMA HR IT Dashboard allows administrators to onboard multiple IT staff members efficiently. Users can manually add rows or upload a CSV file containing required columns—user ID, first name, middle name, last name, and email. Once the entries are loaded, the system displays them for review, and clicking “Register All IT Department Members” finalizes the batch registration. This tool streamlines mass onboarding, reduces manual input, and ensures consistent data entry across the IT department.

Figure 7.3 After UploadingThe IT Department Users CSV

After uploading the CSV file, the Bulk IT Department Registration panel displays all loaded entries, showing each member’s user ID, name, email, and other relevant fields. Once verified, users can click “Register All IT Department Members” to finalize the batch registration. This confirms that the system has successfully processed the file and is ready to onboard all entries in one go, streamlining mass registration while ensuring accurate and consistent data across the IT department.

Figure 7.4 Edit IT Department User

The Edit IT Department User feature in the PHINMA HR IT Dashboard allows administrators to update the details of an existing IT staff member. By clicking the Edit button next to a user's entry, a modal window opens with pre-filled fields such as User ID, First Name, Middle Name, Last Name, and Email. Users can make necessary changes and click Save to apply updates instantly. This ensures that IT personnel records remain accurate and up to date across the system.

Figure 7.5 Delete IT Department User

The Delete User feature in the PHINMA HR IT Dashboard allows administrators to permanently remove an individual IT staff member from the system. When the Delete button is clicked next to a user's entry, a confirmation dialog appears showing the user's name and a warning that the action is irreversible. Once confirmed, the system deletes all associated data for that user, ensuring clean and secure management of personnel records.

Figure 7.6 Delete Multiple IT Department Users

The Delete Multiple Users feature in the PHINMA HR IT Dashboard allows administrators to remove several IT department accounts at once. After selecting multiple users, clicking Delete Selected opens a confirmation dialog listing the number of accounts to be deleted. The system clearly warns that this action is irreversible and will permanently erase all associated data. Once confirmed, the selected users are deleted instantly, making it easy to clean up outdated or incorrect records in bulk.

Figure 8.0 Department Management Page

The Department Dashboard in PHINMA Education is designed to help administrators manage academic departments and their associated programs with ease. On the left sidebar, users can navigate to related modules such as IT Department, Programs, Subjects, Students, Enlisted Subjects, Human Resources, and Campus Configuration. The main panel features two key actions: Add New Department and Add New Program, both accessible via clickable buttons for quick setup. A search bar allows users to locate departments or programs efficiently. Each department entry displays its name, the number of programs it contains, and includes a Remove Department button for deletion. At the bottom, the Recent Departments section provides a snapshot of the latest additions, including department name and campus affiliation. This layout ensures users can create, manage, and monitor department data with clarity, while the sidebar and footer confirm the logged-in user's identity and institution for accountability.

Figure 8.1 Add New Department

The Add New Department feature in the PHINMA Education Department Dashboard allows administrators to create a new academic department manually. Users enter a unique Department Code (e.g., CITE, CAS, CICS) into the input field and click the Add Department button to register it into the system. This action instantly updates the department list and links the new entry to future program assignments. The feature ensures that department creation is quick, structured, and aligned with campus configuration standards.

The screenshot displays the PHINMA Education Department Dashboard. On the left is a sidebar with navigation links: IT Department, Departments (highlighted), Programs, Subjects, Students, Enlisted Subjects, Human Resources, Campus, and Configuration. The main content area is titled 'Department Dashboard' with the subtitle 'Manage departments and view usage statistics'. It features a 'Department Management' section with an 'Add New Department' button and a link to 'Click to add a new department'. To the right is a 'Add New Program' form with a 'Select Department' dropdown menu (showing 'Choose a department...'), a 'Program Code' input field (with placeholder text 'e.g., BSIT, BSCS, BSCE'), and 'Add Program' and 'Cancel' buttons. Below the form is a search bar labeled 'Search departments or programs...'. A list of departments is shown, including 'COLLEGE OF INFORMATION TECHNOLOGY EDUCATION' with '1 program' and a 'Remove Department' button. At the bottom is a 'Recent Departments' table with columns for 'Department Name' and 'Campus', listing 'COLLEGE OF INFORMATION TECHNOLOGY EDUCATION' and 'PHINMA-University of Pangasinan Dagupan Campus'. A user profile for 'Carlos Son Perez Rivo' is visible in the bottom left, along with a 'Logout' button and version information 'v1.0 © 2025 PHINMA'.

Figure 8.2 Add New Program

The Add New Program feature in the PHINMA Education Department Dashboard allows administrators to assign academic programs to existing departments. Users begin by selecting a department from the dropdown menu labeled “Choose a department...”, then enter a unique Program Code (e.g., BSIT, BSCS, BSCE) into the input field. Clicking the Add Program button registers the new program under the selected department, instantly updating the system’s program list. This feature ensures structured program creation and seamless integration into the department hierarchy.

Figure 8.3 Remove Department

The Remove Department feature in the PHINMA Education Department Dashboard allows administrators to permanently delete an academic department and all its associated programs. When the Remove Department button is clicked, a confirmation dialog appears showing the department name and a warning that the action is irreversible. Once confirmed, the system deletes the department and its linked data, ensuring clean and intentional management of academic structures.

Figure 8.4 View Programs per Department

The View Programs per Department feature in the PHINMA Education Department Dashboard allows administrators to see which academic programs are assigned to each department. Under the department listing, the number of programs is displayed (e.g., “1 program”), and the specific program codes such as BSIT are shown directly beneath the department name. This setup provides a clear, immediate overview of departmental offerings, helping users verify program assignments and maintain organized academic structures.

Figure 8.5 Remove Program

The Remove Program feature in the PHINMA Education Department Dashboard allows administrators to permanently delete a specific academic program from its assigned department. When the Remove button is clicked, a confirmation dialog appears showing the program name and department, along with a warning that the action is irreversible. Once confirmed, the system deletes the program and updates the department's program count, ensuring clean and intentional academic structure management.

Figure 9.0 Program Management Page

The Program Management Dashboard in PHINMA Education provides administrators with a streamlined interface to oversee academic programs across departments. The sidebar offers quick navigation to related modules such as Departments, Subjects, Students, and Campus Configuration. In the main panel, users can view detailed program entries including the Program Name, Assigned Department, Program Head, and Last Updated Date. Each program also includes action buttons like View Subjects, Add Subject, and Program Head, allowing users to manage curriculum and leadership assignments directly. The Search Bar helps filter programs by name or department, while the Recent Programs section offers a snapshot of the latest updates. This layout ensures that users can efficiently monitor, update, and expand academic offerings with clarity and control.

Figure 9.1 Assign Program Head

The Assign Program Head feature in the PHINMA Education Program Management Dashboard allows administrators to designate a faculty member as the head of a specific academic program. Within the modal window, users select a name from the Program Head (Optional) dropdown, which includes both the full name and ID of eligible personnel. Once selected, clicking Update Program confirms the assignment, and a green success message appears to indicate completion. This feature ensures clear leadership roles are documented and linked to each program for accountability and coordination.

Figure 9.2 Add Subjects to Program

The Add Subjects to Program feature in the PHINMA Education Program Management Dashboard allows administrators to assign specific subjects to an academic program. Within the modal window, users can search and select subjects relevant to the program and view details like block and year level. Once selections are made, clicking Save Subjects links them to the program, ensuring that curriculum structure is properly organized and aligned with academic requirements.

Figure 9.3 View Assigned Subjects

The View Assigned Subjects feature in the PHINMA Education Program Management Dashboard allows administrators to review which subjects are currently linked to a specific academic program. When accessed, a modal window displays a list of assigned subjects along with details like block and year level. This feature provides a clear overview of the curriculum structure, helping users verify subject alignment and ensure academic consistency across programs.

Figure 9.4 Remove Assigned Subject

The Remove Assigned Subject feature in the PHINMA Education Program Management Dashboard allows administrators to delete a specific subject from an academic program. When the Remove button is clicked next to a listed subject a confirmation dialog appears, clearly stating the subject and its block and year level. Once confirmed, the subject is permanently removed from the program's curriculum, helping maintain accurate and intentional subject assignments.

Figure 10.0 Subject Management Page

The Subject Management Dashboard in PHINMA Education is designed to help administrators manage college-level subjects and their teacher assignments efficiently. From the sidebar, users can navigate to related modules such as Departments, Programs, Students, and Campus Configuration. In the main panel, users can either add a single subject manually or use the bulk registration feature to upload multiple subjects at once. Each subject entry displays key details including the Subject Name, Block, Assigned Teacher, Year Level, Department, Program, and Last Updated Date. Action buttons like Edit and Delete allow users to update or remove subject records as needed. The Recent Subjects section provides a quick view of the latest entries for easy tracking. This layout ensures that academic subjects are organized, up-to-date, and properly linked to their respective programs and instructors.

The screenshot displays the PHINMA Education Subject Management dashboard. On the left is a sidebar with navigation links: IT Department, Departments, Programs, Subjects (highlighted), Students, Enlisted Subjects, Human Resources, Campus Configuration, and a user profile for Carlos Son Perez Rivo. The main content area is titled 'Subject Management' with the subtitle 'Manage subjects and teacher assignments for your campus'. It features four tabs: College (selected), Graduate, Senior High School, and Junior High School. The 'Add Single Subject' form includes the following fields: Subject Name (text input, example: 'Data Structures and Algorithms'), Department (dropdown menu, example: 'Select a department'), Program (dropdown menu, example: 'BSIT'), Section (text input, example: '3A'), Block (auto-generated text input, example: 'BSIT-3A'), Year Level (dropdown menu, example: '3rd Year'), and Teacher (dropdown menu, example: 'Prof. Juan Dela Cruz'). At the bottom of the form are 'Create Subject' and 'Cancel' buttons. To the right of the form is a 'Bulk Subject Registration' section with a green link that says '+ Click to add multiple subjects'.

Figure 10.1 Add Single Subject

The Add Single Subject feature in the PHINMA Education Subject Management Dashboard allows administrators to manually register a new academic subject for College, Graduate, Senior High School, or Junior High School levels. Users fill out a structured form that includes fields for Subject Name, Department, Program, Section, Block (auto-generated), Year Level, and Teacher Assignment. Once completed, clicking the Create Subject button adds the subject to the system and links it to the appropriate program and instructor. This feature ensures precise subject setup and supports individualized curriculum planning.

Figure 10.2 Bulk Subject Registration

The Add Bulk Subjects feature in the PHINMA Education Subject Management Dashboard allows administrators to register multiple academic subjects at once using a CSV upload. This option streamlines the process of subject creation, especially for large batches across different year levels and departments. By clicking the Bulk Subject Registration link, users can import structured data that includes subject names, blocks, year levels, teacher assignments, and program affiliations. This feature ensures efficient onboarding of subjects while maintaining consistency and reducing manual entry errors.

Figure 10.3 After Uploading Subjects CSV

The After Uploading the Subjects' CSV feature in the PHINMA Education Subject Management Dashboard activates once administrators import a batch of subjects via the bulk registration panel. The system parses the uploaded CSV file and displays a preview of all entries, including fields like Subject Name, Program, Section, Block, and Year Level. A button labeled Register All (50) confirms the total number of subjects ready for registration. Clicking this button finalizes the process, instantly adding all listed subjects to the system and linking them to their respective departments and instructors. This ensures fast, accurate onboarding of large subject datasets.

Figure 10.4 Edit Subject

The Edit Subject feature in the PHINMA Education Subject Management Dashboard allows administrators to update the details of an existing academic subject. When the Edit button is clicked, a modal window opens with pre-filled fields such as Subject Name, Department, Program, Section, Block, Year Level, and Assigned Teacher. Users can modify any of these fields and click Update Subject to save the changes. This ensures that subject records remain accurate, up-to-date, and properly aligned with the curriculum and faculty assignments.

Figure 10.5 Delete Subject

The Delete Subject feature in the PHINMA Education Subject Management Dashboard allows administrators to permanently remove a subject from the system. When the Delete button is clicked next to a subject entry a confirmation dialog appears asking if the user is sure about the deletion. Once confirmed, the subject is erased from the database, ensuring that outdated or incorrect entries are cleaned up and the curriculum remains accurate and up-to-date.

Figure 10.6 Delete Multiple Subjects

The Delete Multiple Subjects feature in the PHINMA Education Subject Management Dashboard allows administrators to remove several subjects at once for faster cleanup and curriculum adjustments. After selecting multiple entries from the subject list, a confirmation dialog appears stating the number of subjects chosen (e.g., “Delete 3 selected subject(s)?”). Clicking the Delete button permanently removes all selected subjects from the system, ensuring efficient bulk management while preventing accidental deletions through a clear confirmation step.

Figure 11.0 Enlisted Subjects Management Page

The Students with Enlisted Subjects dashboard in PHINMA Education is designed to help administrators view student enlistment records by campus and academic period. To begin, users must first enter the correct Academic Period in the input field provided. The format varies by education level: for Junior High School, use "YYYY-YYYY" (e.g., 2024-2025), while for College, Senior High School, or Graduate programs, use "YYYY-YYYY-S" (e.g., 2024-2025-1). Once a valid period is entered, the system unlocks access to student enlistment data, allowing users to review which subjects students are enrolled in. This ensures that enlistment records are filtered accurately by term and level. Additionally, the Bulk Enlist button in the top-right corner allows for mass registration of subjects, streamlining the process for large batches. This setup ensures that academic tracking is both precise and scalable across departments.

Figure 11.1 After Stating the Academic Period

Once the Academic Period is correctly entered in the PHINMA Education dashboard, the Students with Enlisted Subjects section becomes fully interactive. Users can now filter student enlistment records by Teacher, Department, and Year/Block, or search directly by student name using the search bar. The system automatically detects the education track—Junior High School, Senior High School, College, or Graduate—based on the format of the academic period entered (e.g., 2024-2025 for JHS or 2024-2025-1 for College). This ensures that only relevant student data is displayed. If no matching students are found, the interface will notify the user, helping them refine their filters. For mass registration, the Bulk Enlist button allows administrators to enlist multiple students into subjects efficiently. This setup supports precise tracking and flexible management of student subject enrollment across campuses.

Figure 11.2 Step 1 in Bulk Enlistment

The Bulk Enlistment – Step 1: Select Subjects feature in the PHINMA Education dashboard initiates the process of enrolling multiple students into selected subjects for a given academic period. In this first step, users choose the subjects to be enlisted by searching or filtering through the subject list. Each selected subject is previewed on the right panel, showing its name and block assignment. Once the desired subjects are selected, users proceed to the next step to match them with student records. This step ensures that only relevant subjects are queued for enlistment, streamlining mass registration with clarity and control.

Figure 11.3 Step 2 in Bulk Enlistment

The Bulk Enlistment – Step 2: Select Students feature in the PHINMA Education dashboard allows administrators to choose which students will be enrolled into the previously selected subjects. After completing Step 1, users are presented with a searchable list of student names. Each student can be selected individually or all at once using the Select all visible checkbox. A preview panel on the right confirms the selected students, ensuring accuracy before proceeding. Once the desired students are chosen, clicking Next moves the process forward to finalize enlistment. This step ensures that subject registration is targeted and efficiently managed across student groups

Figure 11.4 Step 4 in Bulk Enlistment

The Bulk Enlistment – Step 3: Confirmation feature in the PHINMA Education dashboard finalizes the mass registration process by summarizing all selected subjects and students. After completing Steps 1 and 2, this confirmation dialog displays the total number of subjects and students involved, along with a calculated count of enlistments to be created or updated (e.g., 4 subjects $\times$ 1 student = 4 enlistments). The list of subjects and student names is shown for review, ensuring transparency before proceeding. Clicking Confirm & Enlist completes the process, officially registering each student-subject combination into the system. This step safeguards accuracy and provides a final checkpoint before committing changes.

Figure 11.5 Assign Subjects

The Assign Enlistment feature in the PHINMA Education dashboard allows administrators to manually assign subjects to a specific student for a given academic period. In the Assign Subjects modal, users can search and select subjects relevant to the student; each displayed with its block designation. Selected subjects are marked with checkboxes and can be reviewed before saving. Once finalized, clicking Save Subjects links the chosen subjects to the student's record, ensuring personalized and accurate enrollment management.

Figure 11.6 View Enlisted Subjects

The View Enlisted Subjects feature in the PHINMA Education dashboard allows administrators to review the subjects a student is currently enrolled in for a specific academic period. When accessed, a modal displays the full list of enlisted subjects—such as “Advanced Database Systems” and “Human Computer Interaction 2”—along with the assigned teacher for each. Users can select individual or multiple subjects using checkboxes, and options like Select All, Clear Selection, and Remove Selected provide flexible control. This feature ensures transparency in student enrollment and supports quick adjustments when needed.

Figure 12.0 Student Management Page

The Student Management dashboard in PHINMA Education provides administrators with a centralized interface for managing student records across different education levels. Users can toggle between tabs for College, Graduate, Senior High School, and Junior High School to view and organize students by track. The system offers two registration options: Add Single Student for manual entry and Bulk Registration for uploading multiple student profiles at once. A search bar allows quick lookup by User ID, while the student table displays essential details such as Name, Email, Department, Program, Section, Year Level, and Date Created. Each entry includes Edit and Delete actions for updating or removing records. This layout ensures that student data is easy to access, modify, and maintain, supporting efficient enrollment and academic tracking across the institution.

The screenshot displays the PHINMA Education Student Management interface. On the left is a sidebar with navigation links: IT Department, Departments, Programs, Subjects, Students (highlighted), Enlisted Subjects, Human Resources, Campus Configuration, and a user profile for Carlos Son Perez Rivo. The main header is 'Student Management' with the subtitle 'Manage students for your campus'. Below this, there are tabs for 'College' (selected), 'Graduate', 'Senior High School', and 'Junior High School'. A sub-header reads 'Creating and viewing College students.' The central area contains two panels. The left panel, titled 'Add Single Student', has a form with the following fields: 'Education Track' (set to 'College'), 'User ID' (e.g., ST-2024-001), 'First Name' (e.g., Juan), 'Middle Name' (e.g., Santos), 'Last Name' (e.g., Dela Cruz), 'Email' (e.g., Juan.delacruz@phinma.edu.ph), 'Department' (a dropdown menu), 'Program' (a dropdown menu), 'Section' (e.g., A), and 'Year Level' (a dropdown menu). At the bottom of this form are 'Create Student' and 'Cancel' buttons. The right panel, titled 'Bulk Student Registration', contains a green link: '+ Click to add multiple students'. At the bottom of the dashboard, there is a search bar 'Search by User ID (e.g., 24-0001)' and a status indicator 'Total: 1 students'.

Figure 12.1 Add Single Student

The Add Single Student feature in the PHINMA Education Student Management dashboard allows administrators to manually register a new student for a specific education level, such as College. The form includes fields for User ID, Full Name, Email, Department, Program, Section, and Year Level, ensuring that each student profile is complete and properly categorized. Once all details are entered, clicking the Create Student button adds the student to the system. This feature is ideal for precise, one-at-a-time registrations and ensures that each student record is accurate and aligned with institutional data.

Figure 12.2 Bulk Student Registration

The Bulk Student Registration feature in the PHINMA Education Student Management dashboard allows administrators to efficiently onboard multiple students using a CSV file upload. The system accepts structured data with fields such as User ID, First Name, Middle Name, Last Name, Email, Section, Year Level, Department, and Program. Once the CSV is uploaded, the system processes each entry and adds the students to the database in one go. This feature is ideal for handling large batches of student records, ensuring consistency, speed, and reduced manual input during enrollment periods.

Figure 12.3 After Uploading the Student CSV

After Uploading the Student CSV, the system displays a preview list under Students to Add, showing each student's details such as User ID, Name, Email, Section, Year Level, and dropdowns for assigning Department and Program. Users can manually adjust entries if needed, add new rows, or proceed by clicking Register All (50) to finalize the bulk registration. This step ensures accuracy before committing the batch, streamlining enrollment while allowing last-minute edits.

The screenshot displays the 'Student Management' dashboard with a modal window titled 'Edit Student'. The modal contains the following fields:

- Education Track ***: A dropdown menu with 'College' selected.
- User ID ***: A text input field containing 'ST-2025-0003'.
- First Name ***: A text input field containing 'Mark'.
- Middle Name ***: A text input field containing 'Daniel Montes'.
- Last Name ***: A text input field containing 'Perez'.
- Email ***: A text input field containing 'mamo.perez.up@phinmaed.com'.
- Department ***: A dropdown menu with 'COLLEGE OF INFORMATION TECHNOLOGY EDUCA' selected.
- Program ***: A dropdown menu with 'BSIT' selected.
- Section ***: A text input field containing 'BSIT-01'.
- Year Level ***: A dropdown menu with 'Year 1' selected.

At the bottom right of the modal are two buttons: 'Cancel' and 'Update'.

Figure 12.4 Edit Student Information

The Edit Student feature in the PHINMA Education Student Management dashboard allows administrators to update existing student records with accurate and current information. When the Edit button is clicked, a form appears pre-filled with the student's details—such as User ID, Full Name, Email, Department, Program, Section, and Year Level. Users can modify any field as needed and click Update to save the changes. This ensures that student profiles remain consistent with academic records and institutional requirements.

Figure 12.5 Delete Student

The Delete Student feature in the PHINMA Education Student Management dashboard allows administrators to permanently remove a student record from the system. When the Delete button is clicked next to a student entry—such as “Mark Daniel Montes Perez”—a confirmation dialog appears asking if the user is sure about the deletion. Clicking Confirm finalizes the action, ensuring that outdated or incorrect student profiles are cleaned up. This feature helps maintain a streamlined and accurate student database while preventing accidental deletions through a clear confirmation step.

Figure 12.6 Delete Multiple Students

The Delete Multiple Students feature in the PHINMA Education Student Management dashboard enables administrators to efficiently remove several student records at once. After selecting multiple entries—such as “Mark Daniel Montes Perez,” “Kate Figueroa Cruz,” and “Mark Anthony Cruz Ferrer”—a confirmation dialog appears stating the number of students selected for deletion. Clicking Confirm permanently deletes all selected profiles from the system. This bulk action streamlines data cleanup and ensures that outdated or incorrect records can be removed quickly and securely.

Figure 13.0 IT Department HR Management Page

The Human Resources Dashboard in PHINMA Education is designed to help campus administrators manage HR personnel records efficiently. Upon accessing this section, users can view a list of registered HR staff, including details such as User ID, Full Name, Email, and Date Created. Each entry includes Edit and Delete buttons for updating or removing personnel profiles. To onboard new HR staff, users can choose between Add Single HR Personnel for manual entry or Bulk HR Registration for uploading multiple records via CSV. The dashboard also features a Recent HR Personnel section for quick reference to the latest additions. This layout ensures that HR data is organized, editable, and scalable, supporting smooth personnel management across the institution.

Figure 13.1 Add Single HR User

The Add Single HR User feature in the PHINMA Education Human Resources Dashboard allows administrators to manually register a new HR personnel for campus operations. The form includes fields for User ID, First Name, Middle Name, Last Name, Email, and Password, ensuring that each HR profile is complete and secure. Once all required information is entered, clicking the Create HR button adds the personnel to the system. This feature is ideal for precise, one-at-a-time onboarding and ensures that HR records are properly aligned with institutional standards.

Figure 13.2 Bulk HR Registration

The Bulk HR Registration feature in the PHINMA Education Human Resources Dashboard streamlines the process of onboarding multiple HR personnel at once. Administrators can either manually add rows or upload a CSV file containing structured data fields such as User ID, First Name, Middle Name, Last Name, Email, and Password. Once the entries are reviewed, clicking Register All HR finalizes the batch registration. This feature is ideal for handling large-scale HR onboarding efficiently, ensuring consistency and reducing manual workload during setup.

Figure 13.3 After Uploading the HR CSV

The After Uploading the HR CSV feature in the PHINMA Education Human Resources Dashboard activates once a CSV file containing HR personnel data is successfully imported. The system displays a preview list under HR Personnel to Add, showing each entry's details such as User ID, Email, Full Name, and Password. Users can manually adjust any field, add more rows if needed, or proceed by clicking Register All HR (50) to finalize the batch registration. This step ensures accuracy and flexibility before committing the records, making large-scale HR onboarding both efficient and controlled.

Figure 13.4 Edit HR

The Edit HR feature in the PHINMA Education Human Resources Dashboard allows administrators to update existing HR personnel records with accurate and current information. When the Edit button is clicked beside an HR entry—such as “hr0050”—a modal form appears pre-filled with the user’s details including User ID, Full Name, Email, and Date Created. Administrators can modify any field as needed and click Save to apply the changes. This ensures that HR profiles remain up-to-date and aligned with institutional records.

Figure 13.5 Delete HR

The Delete HR feature in the PHINMA Education Human Resources Dashboard allows administrators to permanently remove an HR personnel record from the system. When the Delete button is clicked next to an HR entry, a confirmation modal appears displaying the user’s details and a warning that the action is irreversible. Clicking Delete finalizes the removal, ensuring that outdated or incorrect HR profiles are securely and intentionally cleared from the database.

Figure 13.6 Delete Multiple HR

The Delete Multiple HR feature in the PHINMA Education Human Resources Dashboard enables administrators to efficiently remove several HR personnel records at once. After selecting multiple entries, a confirmation modal appears listing all selected users and warning that the action is permanent and cannot be undone. Clicking Delete finalizes the removal, ensuring that outdated or incorrect HR profiles are securely and intentionally cleared from the system in bulk. This feature streamlines HR data cleanup while maintaining administrative control.

Figure 14.0 Campus Configuration Management Page

The Campus Configuration page in PHINMA Education is designed to help administrators manage feedback form access and academic period settings across different student categories. At the top, the Student Feedback Form Availability section allows toggling permissions for specific groups—Freshmen, Junior High School, Upper Year, and Graduate students—so they can submit feedback forms during designated periods. Below that, the Academic Periods Configuration section is divided into three categories: College/Senior High School, Junior High School, and Graduate. Each category includes an Add Period button, enabling users to define academic timelines for each group. This setup ensures that feedback collection and academic scheduling are tailored to each level, giving administrators full control over when forms are accessible and how academic cycles are structured.

The screenshot displays the 'Campus Configuration' dashboard for PHINMA Education. The left sidebar contains navigation links: IT Department, Departments, Programs, Subjects, Students, Enlisted Subjects, Human Resources, Campus Configuration (highlighted), and a user profile for Carlos Son Perez Rivo. The main content area is titled 'Campus Configuration' and includes a subtitle 'Manage the Student Feedback Form availability and academic year periods for PHINMA-University of Pangasinan Dagupan Campus.' Below this, there is a 'Current Configuration' section with a 'Refresh' button. The 'STUDENT FEEDBACK FORM AVAILABILITY' section contains four checkboxes: 'Freshman SFF' (Allow college freshmen to submit feedback forms), 'Upper Year SFF' (Allow sophomores and higher to submit feedback forms), 'JHS SFF' (Allow junior high school students to submit feedback forms), and 'Graduate SFF' (Allow graduate students to submit feedback forms). The 'ACADEMIC PERIODS CONFIGURATION' section has two sub-sections: 'College / SHS Academic Periods' and 'JHS Academic Periods'. Each sub-section has a 'No periods configured yet' message and an 'Add Period' button. The 'College / SHS Academic Periods' sub-section also shows a form with fields for 'Academic Year' (e.g., 2024-2025), 'Semester' (1st Semester), and 'Term' (Prelim), along with 'Cancel' and 'Add Period' buttons. The 'JHS Academic Periods' sub-section also has an 'Add Period' button.

Figure 14.1 Add Academic Period

The Add Academic Period feature in the PHINMA Education Campus Configuration dashboard allows administrators to define academic timelines for different student levels. Within each category—College/Senior High School, Junior High School, and Graduate—users can click the Add Period button to input details such as Academic Year, Semester, and Term (e.g., Prelim). Once configured, these periods help structure feedback form availability and align system operations with the school calendar. This feature ensures that academic scheduling is clear, consistent, and tailored to each educational track.

Figure 14.2 Remove Academic Period

The Remove Academic Period feature in the PHINMA Education Campus Configuration dashboard allows administrators to delete outdated or incorrect academic timelines. When an academic period—such as “AY 2024–2025 1st Semester Prelim”—is marked for removal, it appears highlighted with a warning label like “Will be removed”. Users can either confirm the deletion or click Undo to cancel the action. This feature ensures that academic schedules remain accurate and relevant, giving administrators control over which periods are active in the system.

Program Heads Pages

Figure 15.0 SFF Dashboard Page Part 1

The SFF Dashboard in PHINMA Education is a centralized interface for monitoring student feedback and teacher rankings across academic programs. Users begin by selecting filters such as Program, Academic Year, Semester, and Period—for example, “BSIT” for AY 2025–2026, 1st Semester, Period 1. Additional filters like Education Track, Year Level, Employment Type, and Teaching Modality help narrow down the dataset. Once configured, the dashboard displays key metrics including the number of Teachers in Ranking, Total Students, Enrolled Subjects, Target Responses, Actual Responses, and the % Actual vs Target, which tracks feedback completion against the 100% goal. This data updates every 10 minutes, allowing administrators to monitor participation and performance in real time. The interface is designed to support feedback-driven evaluation and ensure transparency in academic quality assurance.

Figure 15.1 SFF Dashboard Page Part 2

Scrolling down the SFF Dashboard, Program Heads gain access to detailed Teacher Rankings and individual performance breakdowns. Each teacher is listed with metrics such as Average Score, Net Promoter Scores (Q7 and Q9), Enrolled Students, Target Responses, Actual Responses, and % vs Target. These figures help assess how well each teacher is performing based on student feedback. For example, a teacher like Justin Mc Neal Gonzales Caronongan may appear with full-time status and zero responses, indicating either low engagement or pending feedback collection. Below the ranking table, the Current Teachers section lists all active faculty members with their User ID, Employment Status, and Activity Status, offering a quick reference for HR and academic heads. This section is essential for tracking feedback participation and identifying areas for improvement in teaching quality.

Figure 16.0 COPUS Management Page

The COPUS Management page in PHINMA Education is designed to help administrators and academic supervisors manage classroom observation records using the COPUS (Classroom Observation Protocol for Undergraduate STEM) framework. At the top of the interface, users can click Add COPUS to create a new observation form. To refine the view, filters for Teacher Name and Modality allow users to narrow down entries based on specific instructors or teaching formats (e.g., online, face-to-face). Below the filters, the COPUS Forms Table displays key details such as Teacher, Subject, Program, Modality, Date Created, and available Actions like editing or deleting a form. If no entries are present, the table will show “0 total,” indicating that no observations have been recorded yet. This page ensures that classroom observations are systematically tracked and validated, supporting instructional quality and compliance with academic standards.

The screenshot shows a web application interface for 'COPUS Management'. A modal window titled 'Add COPUS Form' is open, allowing users to create a new observation form. The modal includes the following fields and options:

- Program ***: A dropdown menu with the placeholder text 'Select a program...'. It is the first field to be selected.
- Teacher ***: A dropdown menu with the placeholder text 'Select a program first...'. It becomes enabled after a program is selected.
- Subject ***: A dropdown menu with the placeholder text 'Select a teacher first...'. It becomes enabled after a teacher is selected.
- Teaching Modality ***: A dropdown menu with the placeholder text 'Select modality...'. It becomes enabled after a subject is selected.
- Period Type**: Radio buttons for 'Semester' (selected) and 'Quarter'.
- Academic Year ***: A dropdown menu showing '2025-2026'.
- Semester ***: A text input field containing the value '1'.
- Period ***: A text input field containing the value '1'.
- Period Value**: A read-only field displaying the calculated value '2025-2026-1-1'.
- Buttons**: 'Cancel' and 'Create COPUS Form' buttons at the bottom right.

Figure 16.1 Add COPUS Form

The Add COPUS Form feature in the PHINMA Education COPUS Management dashboard allows administrators and academic supervisors to create structured classroom observation records. Users begin by selecting a Program, which unlocks the dropdowns for Teacher and Subject, ensuring that observations are accurately linked. Additional fields include Teaching Modality, Academic Year, Semester, and Period, which together compute a unique Period Value (e.g., 2025–2026–1–1). Once all required fields are filled, clicking Create COPUS Form saves the entry, enabling systematic tracking of instructional practices for quality assurance and compliance.

Figure 16.2 After Creating COPUS Form

Once a COPUS form is successfully created, the COPUS Management dashboard updates to reflect the new entry. A confirmation message appears at the top, showing the teacher's name and subject. Below, the form is listed in the COPUS Forms Table, displaying key details such as Teacher, Subject, Program, Modality, and Date Created. Each entry includes action buttons like View, Analytics, Observe, and Edit, allowing users to review observation data, analyze performance, initiate follow-up observations, or make corrections. Filters for Teacher Name and Modality help refine the list, making it easier to locate specific forms. This section ensures that classroom observations are properly recorded, accessible, and actionable for academic quality assurance.

- Ind - Individual Work
- Grp - Group Work
- AnsQ - Answering Questions
- AsQ - Asking Questions
- WC - Whole Class Discussion
- SP - Student Presentation
- T/Q - Test/Quiz

Engagement Levels:

- High: 75%+ actively engaged
- Medium: Mixed engagement
- Low: 10-25% engaged

Figure 16.4 COPUS Observation Part 1

The COPUS Observation Workspace is where observers document classroom interactions during each time interval of a session. At the top, the form displays key details like the Teacher's name, Subject, Modality, and Academic Period, ensuring observations are contextually accurate. For each interval, users select observed Student Activities (e.g., Listening, Group Work, Asking Questions) and Instructor Activities (e.g., Lecturing, Moving and Guiding, Posing Questions) using checkboxes. Observers also assign an Engagement Level—Low, Medium, or High—based on student participation, and may add optional Teacher Notes for qualitative insights. The COPUS Codes Legend on the side helps standardize entries, while the Form Summary tracks the number of intervals recorded. This workspace ensures structured, consistent observation that supports instructional evaluation and pedagogical improvement.

- T/Q - Test/Quiz

Engagement Levels:

- High: 75%+ actively engaged
- Medium: Mixed engagement
- Low: 10-25% engaged

Figure 16.5 COPUS Observation Part 2

As you scroll down the COPUS Observation Workspace, you'll reach the core recording panel where each classroom interval is documented. Observers begin by selecting the Interval Number, then check off all relevant Student Activities (e.g., Individual Work, Group Work, Asking Questions) and Instructor Activities (e.g., Lecturing, Posing Questions, Moving and Guiding). An Engagement Level—Low, Medium, or High—is chosen to reflect overall student participation. Optional Teacher Notes and Student Notes fields allow observers to capture qualitative insights, such as instructional strategies or student reactions. Once selections are made, clicking Record Observation logs the interval, which then appears in the Recorded Observations section below. The built-in COPUS Codes Legend and Tips sidebar guide users in making consistent, meaningful entries. This section ensures that each class session is thoroughly documented for instructional analysis and improvement.

Update Form Cancel

Figure 16.6 Edit COPUS Form

The Edit COPUS Form page allows users to revise the details of a previously created classroom observation entry. Key fields include Program, Teacher, Subject, and Teaching Modality, all of which are pre-filled based on the original form. Users can also adjust the Academic Year, Semester, and Period, which automatically updates the Period Value (e.g., 2025–2026–1–1). This ensures that the observation remains correctly aligned with the academic calendar. Once edits are complete, clicking Update Form saves the changes, while Cancel discards them. This feature is essential for maintaining accurate and up-to-date observation records, especially when schedules or teaching assignments shift.

Figure 16.7 COPUS Analytics Part 1

The COPUS Analytics Dashboard provides a visual and statistical breakdown of classroom observation data for a specific teacher and subject. At the top, users see high-level insights such as Engagement Trends, Most Frequent Student and Instructor Activities, and the Percentage of Active Learning observed. For example, if Asking Questions appears as the most frequent student activity and Posing Questions leads among instructor actions, it suggests a dynamic, inquiry-driven classroom.

Below these insights, the dashboard displays Summary Statistics including:

- Total Intervals Recorded
- Completion Rate
- Average Engagement

- Supportive Learning Percentages

Further down, detailed Activity Tallies show how often each student and teacher behavior occurred across intervals, helping users identify patterns in instructional delivery and student participation. Engagement levels—High, Medium, or Low—are also aggregated to reflect overall classroom energy.

This section is essential for academic heads and observers who want to evaluate teaching effectiveness, promote active learning, and identify areas for pedagogical improvement.

Figure 16.8 COPUS Analytics Part 2

Scrolling down the COPUS Analytics Dashboard, users encounter a series of visual charts that bring observation data to life. The Student Activity Frequency bar chart highlights which behaviors occurred most often—such as Asking Questions, Group Work, and Whole Class Discussion—giving insight into how students engaged during the session. The Instructor Activity Frequency chart shows teaching strategies like Demo/Video, Real-time Writing, and Answering Questions, helping assess instructional variety.

A comparative chart titled Student vs Instructor Activity maps paired behaviors across intervals, showing how student actions (e.g., AQ, WC, SP) align with instructor responses (e.g., PQ, D/V, RTW). This helps identify whether teaching methods are prompting active learning.

At the bottom, the Engagement Timeline uses color-coded intervals—Green for High, Orange for Medium, and Red for Low—to visualize how student engagement fluctuated throughout the class. This section is ideal for identifying strong moments and areas needing improvement. Empty Interval Comments and Student Comments fields suggest space for qualitative feedback, encouraging observers to add context beyond numbers.

This visual layer of analytics empowers educators to reflect on teaching dynamics, student responsiveness, and the overall effectiveness of classroom strategies.

Figure 16.9 COPUS Analytics Part 3

At the bottom of the COPUS Analytics Dashboard, users are presented with advanced visual comparisons that highlight the balance between student and instructor activity. The Bar Chart Comparison shows side-by-side frequencies of each activity type—like Asking Questions (AuQ), Demo/Video (DV), Group Work (Grp), and Lecturing (Lec)—with green bars for instructors and blue bars for students. This helps identify which behaviors dominate and whether teaching strategies are prompting student engagement.

Below that, the Engagement Timeline displays color-coded boxes for each interval—Green for High, Yellow for Medium, and Red for Low—offering a quick visual of how engagement fluctuated throughout the session.

Finally, the Activity Profile Comparison uses Radar Charts to map the distribution of activities for both students and instructors. These charts reveal which behaviors were most frequent and whether the classroom leaned more toward passive instruction or active learning. Empty Interval Comments sections suggest that observers can still add qualitative notes to enrich the data.

This section is ideal for academic reviewers and instructors who want to reflect on teaching effectiveness, student responsiveness, and the overall classroom experience.

Figure 17.0 COPUS History Page

The COPUS History page in PHINMA Education provides a centralized view of all completed and pending classroom observation records within a program. Users can search for specific entries using the Search Bar, or refine the list using filters for Modality (e.g., Face-to-Face, Online) and Items per Page to control how many records are displayed at once. Each observation entry includes key metadata such as Teacher Name, Subject, Program, Modality, Academic Period, Date, and Status—which may show as Pending if the observation hasn't been finalized. This section helps academic heads and observers track which COPUS forms have been completed, which are still in progress, and when each was conducted. The Refresh Button ensures the list stays up to date, especially when multiple users are managing observations simultaneously. This page is essential for maintaining a clear audit trail of instructional evaluations across the academic calendar.

Engagement Level Guide
Rate the level of student engagement observed for each behavior. Select ONE engagement level per question.

High-level Engagement (4)
Large fraction of students (75%+) clearly engaged in the class activity or demonstrated expected behavior

Medium-level Engagement (3)
Substantial fractions both clearly engaged/showing behavior and clearly not engaged/not showing expected behavior.

Low-level Engagement (2)
Small fraction (10-25%) obviously engaged or demonstrating expected behavior.

Not Observed (1)
There were missed opportunities that the students could've been engaged more but were not given chances or motivation to do so.

Remarks: Please use this portion to give elaborations on the rating, including possible suggestions on how students could be effectively and consistently engaged in the discussion and activities.

Figure 18.0 Supervisor Rating Page Part 1

The Supervisor Rating Form in PHINMA Education is designed for summative classroom observation, allowing academic supervisors to assess student engagement during a teacher's session. At the top, users input key observation details such as the Teacher to Observe, Subject, Modality, Academic Year, Semester, and Period, which automatically generates a unique Period Value (e.g., 2025–2026–1–1). Below this, the Engagement Level Guide explains how to rate student behavior using four levels: High, Medium, Low, and Not Observed, each with clear criteria based on the percentage of students actively participating. The form then presents specific Learner Behaviors Observed, such as whether students were engaged or on-task, with rating options and a Remarks field for qualitative feedback. This section allows supervisors to elaborate on their ratings and suggest strategies for improving engagement. The form ensures

that classroom observations are not only quantified but also contextualized, supporting continuous improvement in teaching practices.

Guide Towards Active Learning Practice

Reference guide for observing learner behaviors

#	LEARNER BEHAVIORS	WHY IS IT IMPORTANT?	WHAT DO THESE LEARNING BEHAVIORS LOOK LIKE IN CLASS?	INDICATORS OF STUDENT ENGAGEMENT	HIGH-LEVEL ENGAGEMENT	NOT OBSERVED
1	The students were either	Active engagement in class helps in the retention of	Actions based on COPUS codes:	Students are attentive, which	In general, how would you gauge	If the students were not given

Figure 18.1 Supervisor Rating Page Part 2

As users scroll down the Supervisor Rating interface, they encounter a complete list of six learner behaviors, each designed to assess different dimensions of student engagement—from participation in discussions to applying concepts in real-life scenarios. For each behavior, supervisors select a rating: High, Medium, Low, or Not Observed, and may add Optional Remarks to provide context or suggestions for improvement.

Below the ratings, the Rating Preview section summarizes the overall engagement performance. It shows how many behaviors received a High-level Engagement score, calculates the Engagement Percentage, and compares it against the Target Benchmark (e.g., 66.67%). If the score falls short, the system labels it accordingly (e.g., Poor – Significantly below target), helping supervisors identify areas needing attention.

At the bottom, the Guide Towards Active Learning Practice offers a reference table that explains each behavior's importance, classroom indicators, and how to interpret engagement levels. This guide supports consistent, meaningful evaluations and encourages supervisors to reflect on how teaching strategies influence student participation.

This section ensures that observations are not only rated but also interpreted with clarity, promoting actionable feedback and continuous instructional improvement.

Guide Towards Active Learning Practice

Reference guide for observing learner behaviors

#	LEARNER BEHAVIORS	WHY IS IT IMPORTANT?	WHAT DO THESE LEARNING BEHAVIORS LOOK LIKE IN CLASS?	INDICATORS OF STUDENT ENGAGEMENT	HIGH-LEVEL ENGAGEMENT	NOT OBSERVED
1	The students were either actively engaged in the discussion or on-task.	Active engagement in class helps in the retention of information. In whatever modality, we want to maximize class time to engage students in guided activities that help them understand the lesson and give learners the opportunity to scaffold their learning.	Actions based on COPUS codes: Teacher: MG, PQ, FI, P, 1o 1 Student: Ind, Grp, AnQ, AnQ, WC, SP, T/Q Strategies from AL Toolkit: - Following the Lesson Plan Templates that support Active Learning (p. 3-8, AL Toolkit) - Giving clear instructions so students spend more time in the activity instead of clarifying what needs to be done - Going around and checking on work progress	- Students are attentive, which can be seen when they look at the teacher or board during discussions - Students focus on their individual or group work, not using gadgets when not needed in the activity	In general, how would you gauge student engagement in class?	If the students were not given tasks or opportunities to be part of the discussion.
2	The students are asking questions or sharing their ideas either in class, with a group, or in pairs.	An Active Learning class's goal is for students to be part of the learning process, rather than just receivers of information. It is important that a teacher builds a learning environment that makes students feel confident to speak up in class.	Actions based on COPUS codes: Teacher: PQ, WC Student: Grp, AnQ, AnQ, WC, SP Strategies from AL Toolkit: - Cushioning Questions (p. 66) - Setting Procedures and Expectations (p. 67) - Using Truth Signs (p. 68) - Using Risk Language (p. 70)	- Students are willing to answer and share ideas either in class, in groups or in pairs - Students talk to their teacher or classmates to clarify instructions or concepts in class	When the teacher gave activities or opportunities to ask questions and share their ideas, how many of the students were actively engaged?	If there were no instances when the teacher asked the students if they had questions or if there were no activities that encouraged students to share their ideas in class or with their classmates.
3	The students made their thought processes explicit by explaining ideas in their own words and generating ideas.	Giving activities in class should be a way to make the students' thought process more explicit so that teachers could help them make connections and build on their understanding. Engagement in these kinds of activities will also help students develop higher order thinking skills and creative thinking.	Actions based on COPUS codes: Teacher: PQ, AnQ, FI, P Student: Ind, Grp, AnQ, AnQ, SP Strategies from AL Toolkit: - Send-A-Problem (p. 42) - Structured Academic Controversies (p. 55) - Roundtable (p. 58) - Whip Around, Pass Option (p. 63)	- Students explain ideas in their own words - Students solve problems, make decisions, propose solutions, or predict outcomes	When the teacher engaged students in discussions/debates/activities that require students to explain their thoughts, solve problems, etc., how many of the students were actively engaged?	If there were no activities or questions that required students to think and explain ideas in their own words.
4	The students were rethinking or reconsidering their answers, ideas or learning behavior following teacher's timely and meaningful feedback or follow up.	Timely and meaningful feedback in an AL class is important to make sure that misconceptions are corrected and key concepts are clearly understood by students. However, the goal is not always for students to get the right answer. More importantly, students should practice being open to other ideas and corrections as they develop a growth mindset.	Actions based on COPUS codes: Teacher: MG, AnQ, FI, P, 1o 1 Student: Ind, Grp, AnQ, WC, SP Strategies from AL Toolkit: - Mastery Learning Game (p. 39) - Numbered Heads Together (p. 40) - Effective Questioning (p. 41) - Underexplain and Learning Pairs (p. 48) - Wait Time (p. 62)	- Students get 'aha' moments - Students go back to their work or outputs and applies feedback from the teacher - Students try out what the teacher suggested - Students clarify points from the teacher's feedback	When there are opportunities to make follow ups or give feedback to students, how many of the students corrected their mistakes or improved their answers or execution of tasks?	If there were no feedback or follow ups provided by the teacher.
5	The students related or applied what they learned to practical/real-life scenarios.	Application of theories and concepts learned should be discussed or experienced by students in class to encourage integrating knowledge from multiple disciplines, promoting a more holistic understanding and better retention of knowledge.	Actions based on COPUS codes: Teacher: Lc, AnQ, PQ, P, V Student: Ind, Grp, SP, T/Q Strategies from AL Toolkit:	- Students participate in simulations and role-playing to apply what they learned in class - Students ask questions on how	When the teacher applied the lesson to practical and real life situations, how many of the students were actively engaged?	If the lesson, theories, or concepts in class were not related to actual work or realistic scenarios.

Figure 18.2 Supervisor Rating Page Part 3

This final section of the Supervisor Rating page presents the full Guide Towards Active Learning Practice, a reference table that explains each learner behavior's purpose, classroom indicators, and what high or missing engagement looks like. It helps supervisors rate consistently and spot missed opportunities for student involvement.

Figure 19.0 Supervisor Rating Analytics Page

The Supervisor Rating Analytics page in PHINMA Education provides a performance overview of faculty members based on classroom observations. Users can filter results by Period and Modality, then click Refresh to update the dashboard. Summary metrics show the Total Observations, Average Rating, and how many teachers are Meeting or Below Target. Ratings are categorized into Excellent, Good, Fair, and Poor, with distribution percentages shown. The Top Performers and Needs Improvement sections highlight individual faculty based on their scores. Below, the Observations Table lists detailed records including Teacher Name, Subject, Modality, Period, Rating, and Date, with a View button for deeper insights. This page helps program heads monitor teaching quality, identify strengths, and prioritize support for instructors needing improvement.

Figure 19.1 Observation Details

The Observation Details modal in the Supervisor Rating Analytics section provides a breakdown of how a teacher was evaluated during a classroom observation. It displays the Teacher’s Name, Subject, Observer, and the final Rating Percentage (e.g., 50.00%). Below that, the Engagement Ratings Table lists six learner behaviors, each rated with an engagement level—High, Medium, or Low—alongside optional Remarks. This view helps supervisors and program heads understand which areas of student engagement were strong and which may need improvement, offering a clear summary of classroom dynamics during the observed session.

Figure 19.2 Edit Observation

The Edit Observation modal in the Supervisor Rating section allows academic supervisors to revise engagement ratings for a previously recorded classroom observation. It displays key metadata such as the Teacher's Name, Subject, Modality, Academic Year, Semester, and Period, which together define the Period Value (e.g., 2024–2025–1–1). Below this, supervisors can update ratings for each Learner Behavior, selecting from High, Medium, Low, or Not Observed, and optionally adding Remarks to clarify their evaluation. This interface ensures that engagement assessments remain accurate and reflective of classroom dynamics, especially when feedback or context needs to be adjusted post-observation.

Figure 20.0 Supervisor Rating History

The Supervisor Rating History page in PHINMA Education provides a chronological record of completed faculty evaluations, allowing users to track past observations for performance review and documentation. Each entry includes key details such as the Teacher’s Name, Subject, Year Level, Modality, Academic Period, Final Rating, and Date of Evaluation. Users can click View Details to access the full breakdown of engagement ratings and remarks. This page is especially useful for program heads and supervisors who need to monitor trends in teaching performance, revisit previous assessments, or prepare reports for academic planning. It ensures transparency and continuity in evaluating instructional quality over time.

Figure 20.1 View Observation Details

The Observation Details modal in the Supervisor Rating History section provides a complete summary of a teacher’s classroom evaluation. It displays key metadata such as the Teacher’s Name, Subject, Modality, Observer, Department, Section and Year Level, and Academic Period, along with the Date and Time the observation was recorded. The Final Rating section shows how many learner behaviors were marked as High-level Engagement, the overall percentage score, and a performance label (e.g., Fair – Approaching target). Below that, the Engagement Breakdown visualizes how many behaviors were rated as High, Medium, Low, or Not Observed. This modal helps supervisors quickly review the depth and quality of student engagement during a session, making it easier to reflect on teaching effectiveness and guide future improvements.

Figure 21.0 Program Head Settings Page

The User Profile page in PHINMA Education provides a centralized view of account details, program assignments, and security settings. At the top, users can see their Full Name, Email Address, and Department Affiliation, confirming their identity and role within the institution. The Profile Information section displays the unique User ID, while the Assigned Programs area lists the academic programs under the user’s supervision, including the number of subjects handled. In the Security section, users can manage their login credentials by clicking Change Password, which opens a secure modal for updating their password. This page ensures that users can verify their account details, monitor their academic responsibilities, and maintain account security—all in one accessible interface.

Figure 21.1 Change Password

The Change Password modal in PHINMA Education’s Settings section allows users to securely update their account credentials. It includes three input fields: Current Password, New Password, and Confirm New Password, all of which are required to proceed. After entering the correct information, users can click Save Changes to update their password or Cancel to exit without making changes. This feature ensures account security and gives users control over their login credentials, especially when prompted to reset or strengthen their password.

Deans Pages

Figure 22.0 Teacher Feedback Dashboard Page Part 1

The Teachers Feedback Dashboard in PHINMA Education allows academic administrators to monitor faculty performance based on student feedback within a selected academic period. Users begin by setting the Period Type, Academic Year, Semester, and Period, which defines the scope of the data. They can then customize the view using filters such as Ranking Order, Department, Education Track, Year Level, Employment Type, and Teaching Modality. Once configured, the dashboard displays summary insights including the Number of Ranked Teachers, Total Unique Students, and Department Affiliation. It also shows whether the current data meets performance targets and updates every 10 minutes for accuracy. This dashboard is essential for deans and department heads to assess teaching effectiveness, identify top performers, and guide professional development based on real-time student feedback.

Figure 22.1 Teacher Feedback Dashboard Page Part 2

Scrolling down, the SFF Dashboard reveals detailed teacher performance metrics and feedback data. It includes the Teachers Ranking section, showing each teacher's Average Score, Net Promoter Scores (Q7 and Q9), and response statistics like Enrolled Students, Target Responses, and Actual Responses. Below that, the Teachers List displays currently employed faculty members with their Employment Type and Status. This section helps department heads monitor individual performance, track feedback participation, and identify which teachers are active during the selected academic period.

Figure 23.0 Deans' COPUS Management Page

The COPUS Management page in PHINMA Education is designed to help academic supervisors and program heads manage classroom observation forms efficiently. At the top, users can filter entries using the Search Bar, Modality Dropdown, Period Selector, and Sort Options to quickly locate specific observations. The Add COPUS button allows users to initiate a new observation form. Below, the COPUS Forms Table displays all recorded observations with key details such as Teacher, Subject, Period, Modality, and Date Created. Each entry includes action buttons—View, Analytics, Observe, and Edit—to access insights, perform evaluations, or update form data. This page ensures streamlined tracking and validation of classroom observations, supporting quality assurance and instructional improvement across academic programs.

The image shows a screenshot of the PHINMA Education application interface. A modal window titled "Add COPUS Form" is open, allowing users to create a new classroom observation record. The modal includes a subtitle "Create a new COPUS observation form with relationship validation." and a close button (X) in the top right corner. The form contains several required fields: "Teacher *" (a dropdown menu with "Select a teacher..." as a placeholder), "Subject *" (a dropdown menu with "Select a teacher first..." as a placeholder), "Program *" (a dropdown menu with "Select a subject first..." as a placeholder), and "Teaching Modality *" (a dropdown menu with "Select modality..." as a placeholder). Below these fields are "Period Type" radio buttons for "Semester" (selected) and "Quarter", followed by "Academic Year *" (a dropdown menu showing "2025-2026"), "Semester *" (an input field showing "1"), and "Period *" (an input field showing "1"). A "Period Value" field displays the generated value "2025-2026-1-1". At the bottom of the modal are "Cancel" and "Create COPUS Form" buttons. The background shows the PHINMA Education dashboard with a sidebar menu and a "COPUS Management" section.

Figure 23.1 Add COPUS Form

The Add COPUS Form interface in PHINMA Education allows users to create a new classroom observation record with structured validation. To begin, users select a Teacher, which dynamically unlocks the Subject and Program fields based on the teacher's assignment. Next, they choose the Teaching Modality and define the Period Type (Semester or Quarter), Academic Year, Semester, and Period, which automatically generates a unique Period Value. Once all required fields are filled, clicking Create COPUS Form finalizes the entry. This form ensures accurate linkage between teacher, subject, and program, streamlining the observation setup process.

The screenshot displays the 'COPUS Form #1' interface in the PHINMA Education system. The sidebar on the left contains navigation links: SFF Dashboard, COPUS Management, COPUS History, Supervisor Rating, SR Analytics, SR History, and Settings. The main content area is titled 'COPUS Form #1' and shows a detailed view of the observation form. It includes a 'Form Information' section with the following details:

Form Information	
Teacher Justin Mc Neal Caronongan PHINMA-University of Pangasinan Dagupan Campus	Observer User ID: 4 program head
Subject Data Structures and Algorithm Block: 1 Year Level: 2	Program BSIT COLLEGE OF INFORMATION TECHNOLOGY EDUCATION
Modality Face-to-face	Academic Period 2025-2026-1-1
Created 12/19/2025, 9:38:42 PM	Last Updated 12/19/2025, 9:38:42 PM

Below the form information, there are four action buttons: 'Continue Observation', 'Edit Form', 'View Analytics', and 'Back to Management'. At the bottom left, a user profile for 'Nicolas Satornoli Leonardo' is shown, along with a 'Logout' button and the version 'v1.0 © 2025 PHINMA'.

Figure 23.2 View COPUS Form

The View COPUS Form interface in PHINMA Education provides a detailed summary of a classroom observation record. It displays essential information such as the Teacher's Name, Subject, Modality, Program, Academic Period, and Observer Identity, along with timestamps for when the form was created and last updated. This view allows users to review the observation setup before proceeding to analytics or edits. It's especially useful for program heads and observers to verify form accuracy, confirm relationships between teacher and subject, and ensure the observation is properly documented.

Figure 23.3 COPUS Analytics

The COPUS Analytics modal provides a comprehensive analysis of classroom observation data. It displays key metrics such as Total and Recorded Intervals, Completion Rate, and Average Engagement, helping users assess observation coverage. The dashboard also summarizes Student and Teacher Actions, showing how many behaviors support active learning. Engagement levels are visualized through a Student Engagement Distribution, while Radar Charts compare activity profiles for both students and instructors. This section helps team learning evaluate teaching dynamics, identify strengths, and pinpoint areas for pedagogical improvement.

Figure 23.4 COPUS Observation

The COPUS Observation Workspace in PHINMA Education is where observers record classroom activities in real time using structured intervals. For each Observation Interval, users select observed Student Activities (e.g., Listening, Group Work, Asking Questions) and Instructor Activities (e.g., Lecturing, Posing Questions, One-on-One). They also assign an Engagement Level—Low, Medium, or High—and can add Teacher Notes and Student Notes to capture qualitative insights. A legend on the side helps decode activity codes, while tips guide users to pair actions meaningfully. This workspace ensures consistent, detailed documentation of classroom dynamics, supporting data-driven teaching evaluations.

Engagement Level Guide

Rate the level of student engagement observed for each behavior. Select ONE engagement level per question.

High-level Engagement (4)

Large fraction of students (75%+) clearly engaged in the class activity or demonstrated expected behavior

Medium-level Engagement (3)

Substantial fractions both clearly engaged/showing behavior and clearly not engaged/not showing expected behavior

Low-level Engagement (2)

Small fraction (10-25%) obviously engaged or demonstrating expected behavior

Not Observed (1)

There were missed opportunities that the students could've been engaged more but were not given chances or motivation to do so.

Remarks: Please use this portion to give elaborations on the rating, including possible suggestions on how students could be effectively and consistently engaged in the discussion and activities.

Learner Behaviors Observed

#	LEARNER BEHAVIOR	HIGH	MEDIUM	LOW	NOT OBSERVED	REMARKS
1	The students were either actively engaged in the discussion or on-task.	☐	☐	☐	☒	Optional remarks...

Figure 25.0 Supervisor Rating Form Page

The Supervisor Rating Form in PHINMA Education is used by observers to conduct summative evaluations of classroom engagement. To begin, users select the Teacher, Subject, Modality, and define the Academic Period using fields for Period Type, Academic Year, Semester, and Period. The form includes an Engagement Level Guide that explains how to rate student participation—from High-level Engagement (75%+ actively involved) to Not Observed (missed opportunities). Below this, the Learner Behaviors Observed section lists specific classroom behaviors, each requiring a rating of High, Medium, Low, or Not Observed, with optional remarks for context. This structured approach ensures consistent, evidence-based evaluations that help supervisors assess teaching effectiveness and student involvement

Figure 26.0 Supervisor Rating Analytics Page

The Supervisor Rating Analytics page in PHINMA Education provides a visual summary of faculty performance based on classroom observations. Users can filter data by Period and Modality, then click Refresh to update the dashboard. The top section displays key metrics: Total Observations, Average Rating, and how many teachers are Meeting or Below Target. Ratings are categorized into Excellent, Good, Fair, and Poor, helping users quickly assess distribution. The By Modality section breaks down performance by teaching format (e.g., Face-to-Face), while Top Performers and Needs Improvement highlight individual faculty based on their scores. Below, the Observations Table lists detailed records including Teacher Name, Subject, Modality, Period, Rating, and Date, with a View link for deeper insights. This page helps department heads and program chairs monitor instructional quality, identify areas for support, and recognize standout educators.

Figure 26.1 View Observation

The View Observation feature in the Supervisor Rating Analytics page allows users to access a detailed breakdown of a specific classroom evaluation. When selected, it opens a modal showing the Teacher's Name, Subject, Department, Section and Year Level, Observer, Modality, and Academic Period, along with the Date and Time of the observation. It also displays the Final Rating and a summary of engagement levels—how many behaviors were rated as High, Medium, Low, or Not Observed. Each learner behavior is listed with its corresponding rating, offering a clear picture of student engagement during the session. This feature helps supervisors reflect on instructional effectiveness and guide targeted feedback for faculty development.

Figure 27.0 Supervisor Rating History Page

The Supervisor Rating History page in PHINMA Education serves as a centralized log of all summative classroom observations conducted within a department. Users can search for specific records using the Search Bar, filter by Modality and Period, and adjust the number of entries shown per page. Clicking Refresh updates the table with the latest data. Each observation entry includes details such as Teacher Name, Subject, Modality, Academic Period, Final Rating, and Date Created, with action buttons to View or Delete the record. The + New Observation button allows users to initiate a fresh evaluation. This page helps academic supervisors track faculty performance over time, manage observation records efficiently, and ensure transparency in instructional assessments.

Figure 27.1 View SR Observation in SR History

The View Observation feature in the Supervisor Rating History page of PHINMA Education allows users to access detailed records of completed classroom evaluations. When selected, it opens a modal displaying key information such as the Teacher's Name, Subject, Section and Year Level, Modality, Observer, and Academic Period, along with the Date and Time of the observation. It also shows the Final Rating, a summary of engagement levels, and a breakdown of how many learner behaviors were rated as High, Medium, Low, or Not Observed. This view helps supervisors and program heads reflect on teaching effectiveness and student engagement, making it easier to guide faculty development and maintain evaluation transparency.

Figure 28.0 Deans' Settings Page

The Settings – Profile Information page in PHINMA Education allows users to view and manage their personal and professional account details. At the top, users can see their Full Name, Email Address, User ID, and Department Affiliation, confirming their identity within the system. The Profile Information section organizes these details clearly, while the Security Settings area provides access to password management. By clicking Change Password, users can securely update their login credentials. This page ensures that users can verify their account data and maintain security, making it a vital part of personal account maintenance and system integrity.

Figure 28.1 Change Password

The Change Password feature in PUNDA Education allows users to securely update their login credentials. The modal includes three required fields: Current Password, New Password, and Confirm New Password, each with placeholder examples to guide input. The new password must be at least 8 characters long, and users must re-enter it to confirm accuracy. Once completed, clicking Save Changes updates the password, while Cancel exits the process without saving. This feature ensures account security and gives users control over their authentication details.

Active Learning Coach Pages

Figure 29.0 ALC COPUS Management Page

The COPUS Management page in PHINMA Education allows users to oversee and interact with classroom observation records. At the top, users can filter entries by Teacher Name and Modality, making it easy to locate specific forms. Each listed COPUS entry displays key details such as the Teacher, Subject, Program, and Observer, along with action buttons for View, Analytics, Observe, and Edit. These options let users review observation data, analyze engagement metrics, conduct new intervals, or update form details. This page is essential for program heads and observers to manage observation workflows efficiently and ensure accurate documentation of teaching practices.

The screenshot shows a web application interface with a sidebar on the left containing navigation links like 'Program Management', 'COPUS History', 'Supervisor Rating', 'All Activities', 'All History', and 'Profile'. The main content area is titled 'COPUS Management' and 'Filter COPUS Forms'. Overlaid on this is a modal dialog box titled 'Add COPUS Form'. The dialog contains the following fields and controls:

- Program ***: A dropdown menu with the placeholder text 'Select a program first...'.
- Teacher ***: A dropdown menu with the placeholder text 'Select a program first...'.
- Subject ***: A dropdown menu with the placeholder text 'Select a teacher first...'.
- Teaching Modality ***: A dropdown menu with the placeholder text 'Select modality...'.
- Period Type**: Two radio buttons, 'Semester' (selected) and 'Quarter'.
- Academic Year ***: A dropdown menu showing '2025-2026'.
- Semester ***: An input field containing the value '1'.
- Period ***: An input field containing the value '1'.
- Period Value**: A read-only field displaying '2025-2026-1-1'.
- Buttons**: 'Cancel' and 'Create COPUS Form' at the bottom right.

Figure 29.1 ALC Add COPUS Form

The Add COPUS Form allows users to create a new classroom observation record by selecting key parameters. To begin, users choose a Program, which dynamically unlocks the Teacher and Subject dropdowns based on availability. Next, they specify the Teaching Modality (e.g., Face-to-Face), Period Type (Semester or Quarter), and input the Academic Year, Semester, and Period. These values automatically generate a Period Value for consistency. Once all required fields are filled, clicking Create COPUS Form registers the observation setup, while Cancel exits without saving. This structured workflow ensures accurate and standardized observation tracking across departments.

Figure 29.2 ALC View COPUS Form

The View COPUS Form allows users to access the full details of a specific classroom observation record. When selected, it opens a comprehensive summary that includes the Teacher's Name, Subject, Program, Modality, Observer, and Academic Period, along with timestamps for when the form was Created and Last Updated. This view also provides action buttons such as Continue Observation, Edit Form, and View Analytics, enabling users to follow up, revise, or analyze the observation. It's a vital tool for program heads and observers to verify documentation, monitor engagement, and ensure observation accuracy.

Figure 29.3 ALC COPUS Analytics

The COPUS Analytics feature provides a detailed breakdown of classroom dynamics based on interval-based observations. It summarizes key metrics such as Total Intervals, Completion Rate, and Average Engagement, helping users assess how actively students participated during the session. The dashboard also displays Tallies of Student and Teacher Actions, including behaviors like Listening, Group Work, Lecturing, and Posing Questions, along with percentages that reflect support for active learning. At the bottom, the Student Engagement Summary categorizes intervals into High, Medium, or Low Engagement, offering a clear view of overall classroom responsiveness. This tool is essential for observers and program heads to evaluate teaching strategies and improve learning outcomes.

Figure 29.4 ALC COPUS Observation

The COPUS Observation Workspace is designed for real-time classroom observation using the COPUS framework. Click the ‘Add COPUS’ button in order to create a COPUS form. During each interval, observers can record specific Student Activities such as Listening, Individual Work, Group Work, Asking or Answering Questions, and Whole Class Discussion, as well as Instructor Activities like Lecturing, Writing, Guiding, Posing Questions, and Demonstrating. Observers also select the Engagement Level—Low, Medium, or High—based on student participation. A COPUS Codes Legend on the right helps users interpret activity abbreviations and engagement criteria, while the Interval History below tracks previously recorded entries with timestamps. This workspace ensures structured, consistent documentation of classroom behaviors, supporting accurate analysis and instructional feedback.

Figure 29.5 Edit COPUS Form

The Edit COPUS Form feature in PHINMA Education allows users to update the metadata of an existing classroom observation record. When accessed, it displays pre-filled fields such as Teacher, Subject, Program, and Academic Period, while allowing changes to parameters like Modality, Period Type, Semester, and Period. After making adjustments, users click Update Form to save changes or Cancel to discard them. This feature ensures that observation records remain accurate and aligned with current teaching setups, making it a vital tool for maintaining data integrity across departments.

Figure 30.0 ALC COPUS History

The COPUS History page in PHINMA Education provides users with a centralized view of all classroom observation records conducted using the COPUS framework. At the top, users can search by Teacher Name, filter by Modality, and adjust the number of entries shown per page to streamline navigation. Clicking Refresh updates the table with the latest data. Each record displays key details including the Teacher, Subject, Program, Modality, Academic Period, Date, and Status (e.g., Pending or Completed). This page helps observers, program heads, and academic supervisors monitor observation coverage, track progress, and ensure that all teaching evaluations are properly documented and accessible for review.

Engagement Level Guide
Rate the level of student engagement observed for each behavior. Select ONE engagement level per question.

High-level Engagement (4) Large fraction of students (75+%) clearly engaged in the class activity or demonstrated expected behavior	Medium-level Engagement (3) Substantial fractions both clearly engaged/showing behavior and clearly not engaged/not showing expected behavior.	Low-level Engagement (2) Small fraction (10-25%) obviously engaged or demonstrating expected behavior.	Not Observed (1) There were missed opportunities that the students could've been engaged more but were not given chances or motivation to do so.
---	--	--	--

Remarks: Please use this portion to give elaborations on the rating, including possible suggestions on how students could be effectively and consistently engaged in the discussion and activities.

Figure 31.0 ALC Supervisor Rating Form Page

The Supervisor Rating Form is designed to help observers assess student engagement during classroom activities. To begin, users fill out the Observation Information section by selecting the Teacher, Subject, Modality, Observer Name, Period Type (Semester or Quarter), Academic Year, Semester, and Period. Below this, the Engagement Level Guide explains how to rate student behavior using four levels: High, Medium, Low, and Not Observed, based on how actively students participate. In the Learner Behaviors Observed section, users evaluate each behavior by selecting the appropriate engagement level and optionally adding remarks for context. This structured form ensures consistent, evidence-based evaluations that support faculty development and instructional improvement.

Figure 32.0 ALC Supervisor Rating Analytics Page

The Supervisor Rating Analytics page provides a visual and data-driven summary of faculty performance based on summative observations. Users can filter results by Period and Modality to narrow down the dataset. At the top, key metrics are displayed, including Total Observations, Average Rating, Meeting Target Count, and Below Target Count, helping supervisors quickly assess departmental performance. The Distribution panel categorizes ratings into Excellent, Good, Fair, and Poor, while the By Modality section breaks down ratings based on teaching formats like Face-to-Face. The dashboard also highlights Top Performers and those who Need Improvement, offering actionable insights. Below, the Observations Table allows users to search and toggle between My Observations and Department Observations, with each entry showing the Teacher, Subject, Modality, Period, Rating, and Date, along with a View

button for deeper review. This page is essential for academic leaders to monitor instructional quality, identify strengths and gaps, and guide faculty development.

Figure 32.1 View Observation Details

The View Observation Details feature in the Supervisor Rating Analytics page allows users to open a detailed summary of a specific observation. When clicked, it displays the Observation Details in a pop-up window, including the Teacher's Name, Subject, Observer, and Final Rating. Below that, a table outlines each Learner Behavior, its corresponding Engagement Level (e.g., High, Medium), and space for Remarks. This feature helps supervisors and program heads review how engagement was assessed, verify observation accuracy, and identify areas for instructional improvement.

Figure 33.0 ALC Supervisor Rating History Page

The Supervisor Rating History page in PHINMA Education provides a searchable archive of all completed supervisor evaluations for faculty members. Users can filter records by Period, Modality, and adjust the number of entries shown per page to streamline navigation. Each entry in the table includes key details such as Teacher Name, Subject, Program, Year Level, Modality, Academic Period, Final Rating, and Date of Evaluation. The View Details button allows users to access the full observation breakdown, including engagement metrics and remarks. This page is essential for department heads and observers to monitor faculty performance over time, review past evaluations, and ensure transparency in instructional assessments.

Figure 33.1 View Observation Details

The View Details feature in the Supervisor Rating History page allows users to access a complete breakdown of a teacher’s summative observation. When selected, it opens a detailed pop-up showing the Teacher’s Name, Department, Subject, Section and Year Level, Modality, Observer, and Observation Period, along with timestamps for when the evaluation was created. It also summarizes the Final Rating, including how many items were rated as High, Medium, Low, or Not Observed, and provides an overall evaluation remark (e.g., “Fair – Approaching target”). This feature helps supervisors and department heads review engagement data in context and supports informed feedback for instructional improvement.

Figure 34.0 ALC Profile Page

The Profile Page allows users to view and manage their personal account details. At the top, the Profile Information section displays the user's Full Name, Email Address, and System ID, confirming their identity within the platform. The Assigned Programs section shows any academic programs linked to the user—if none are listed, it means no programs have been assigned yet. Under Security, users can update their login credentials by clicking the Change Password button, ensuring account safety and privacy. This page is essential for verifying user identity, maintaining secure access, and keeping academic affiliations up to date

Figure 34.1 ALC Change Password

The Change Password feature allows users to securely update their account credentials. When activated, a pop-up form appears with three required fields: Current Password, New Password, and Confirm New Password. Users must enter their existing password to verify identity, then input and confirm a new password to ensure accuracy. Once all fields are filled, clicking Save Changes updates the password, while Cancel exits the process without making changes. This feature is essential for maintaining account security and should be used regularly to protect personal and institutional data.

Super Admin Pages

Figure 35.0 Super Admin Analytics Dashboard Page

The Analytics Dashboard in the Super Admin provides users with a high-level overview of system-wide metrics and campus configurations. At the top, users can view summary statistics such as Total Students, Total Admins, and Total Campuses, offering a quick snapshot of institutional scale. The Campus Breakdown section features a donut chart that visually compares the number of students and teachers, helping users assess distribution across roles. A dropdown menu allows users to select a specific campus, with details dynamically updating based on the selection. On the right, the Campus Configurations panel lists all registered campuses, each with a View button for deeper inspection. The Go to Campus Management button provides direct access to administrative tools for editing or updating campus data. This dashboard is ideal for IT

administrators and academic leaders who need to monitor system usage, manage campus profiles, and make data-informed decisions

Figure 36.0 Super Admin Campus Management Page

The Campus Management page in PHINMA Education allows administrators to oversee and configure campus records within the system. At the top, the Add New Campus section lets users register a new location by entering the campus name and clicking the Add button. Below, the Campus List table displays all existing campuses with their unique IDs and names. Each entry includes action icons for Edit and Delete, enabling quick updates or removal of campus data. This page is essential for maintaining accurate institutional records and supports scalable management across multiple locations. Users should regularly review and update campus entries to ensure system-wide consistency.

Figure 36.1 Super Admin Edit Campus

The Edit Campus feature in PHINMA Education’s Campus Management page allows administrators to update the name of an existing campus. When activated, the selected campus entry becomes editable, enabling users to modify the campus name directly within the list. After making changes, users can confirm the update by clicking the appropriate save icon or cancel to discard edits. This feature ensures that campus records remain accurate and up-to-date, especially when institutional names change or require correction. It’s a simple but essential tool for maintaining clean and consistent system data.

Figure 36.2 Super Admin Delete Campus

The Delete Campus feature in PHINMA Education’s Campus Management page ensures safe and intentional removal of campus records. When triggered, a confirmation dialog appears, warning users that deletion is only allowed if no users are enrolled in the campus. To proceed, users must check the box labeled “I understand the consequences”, which activates the Delete Campus button. This safeguard prevents accidental data loss and reinforces administrative control, making it a secure way to manage institutional records. If unsure, users can click Cancel to exit without making changes.

Figure 37.0 Super Admin IT Department Management Page

The IT Department Management page in PHINMA Education allows administrators to oversee and maintain the list of IT personnel across campuses. At the top, users can choose between Add Single Member for individual registration or Bulk Registration to upload multiple entries at once. The main table displays each member's User ID, Full Name, Email, and Campus, with action icons for Edit and Delete to update or remove records as needed. Pagination controls at the bottom help users navigate through multiple pages of entries. This page is essential for keeping IT department records organized, ensuring that user data is accurate, and streamlining onboarding processes for technical staff.

Figure 37.1 Super Admin Add IT Department User

The Add IT Department User feature enables administrators to register new IT personnel individually. The form includes fields for User ID, First Name, Middle Name, Last Name, Email, Password, and Campus, ensuring that each entry is complete and properly categorized. Once all required information is filled out, clicking Add IT Department User saves the new member to the system, while Cancel exits the form without changes. This feature is ideal for onboarding staff one at a time, maintaining accuracy, and ensuring each user is correctly linked to their campus.

The screenshot displays the PHINMA Education IT Department Management interface. The left sidebar contains navigation links: Dashboard, Campus Management, IT Department (selected), Questionnaire, SFF Analytics, SR Analytics, and Settings. The main header shows 'IT Department Management' with a subtitle 'Manage IT Department members across all campuses' and a count of '1 members'.

The interface is divided into two main sections for adding members:

- Add Single Member:** A section for registering one IT Department member.
- Bulk Registration:** A section for registering multiple members at once. It includes a dropdown to 'Select Campus for All Users' (e.g., PHINMA Cagayan de Oro College), a 'Manual entries (0)' section with an 'Add Row' button, and a CSV upload area with instructions: 'Drag CSV here or click to browse. Columns: user_id, first_name, middle_name, last_name, email, password'. At the bottom of this section are buttons for 'Register All IT Department Members (0)' and 'Cancel'.

Below these sections is a table titled 'IT Department Members' showing 1 member. The table has columns for User ID, Full Name, Email, Campus, and Actions. The member listed is Carlos S. Rivo, with email casa.rivo.up@phinmaed.com, at the University Of Pangasinan Dagupan Campus.

At the bottom left, there is a 'Logout' button and version information 'v1.0 © 2025 PHINMA'. At the bottom right, there are pagination controls showing 'Page 1 of 1' and buttons for 'Previous', '1', and 'Next'.

Figure 37.2 Super Admin Bulk IT Department Registration

The Bulk Add IT Department feature streamlines the registration of multiple IT personnel across campuses. Users begin by selecting a Campus, then either manually input member details or upload a CSV file containing columns for User ID, First Name, Middle Name, Last Name, Email, and Password. Once all entries are prepared, clicking Register All IT Department Members finalizes the batch registration, while Cancel exits the process. This tool is ideal for onboarding large groups efficiently, ensuring consistent formatting and reducing manual entry errors.

Figure 37.3 Super Admin After Uploading IT Department CSV

The Bulk Add IT Department feature becomes fully active after uploading a properly formatted CSV file. Once the file is uploaded, the system automatically populates the registration table with each member's User ID, Name, Email, Password, and Campus. Users can review and edit entries directly in the interface before finalizing. When ready, clicking Register All IT Department Members completes the batch registration, while Cancel exits without saving. This streamlined process is ideal for onboarding large groups efficiently, reducing manual input, and ensuring consistent data across campuses.

Figure 37.4 Super Admin Edit IT Department User

The Edit IT Department User feature allows administrators to update the details of an existing IT personnel record. When selected, a modal form appears with editable fields for User ID, First Name, Middle Name, Last Name, Email, Password, and Campus. After making the necessary changes, users can save the updates to ensure the member's profile remains accurate and up to date. This feature is essential for correcting errors, updating credentials, or reassigning campus affiliations within the IT department.

Figure 37.5 Super Admin Delete IT Department User

The Delete IT Department User feature allows administrators to permanently remove a member from the system. When triggered, a confirmation dialog appears asking if the user is sure about deleting the selected member, clearly stating that the action cannot be undone. Users can either click Delete to proceed or Cancel to exit without making changes. This feature is crucial for maintaining an accurate and up-to-date roster, especially when handling role changes, departures, or data corrections.

Figure 37.6 Super Admin Delete Multiple IT Department User

The Delete Multiple IT Department Users feature allows administrators to remove several user records at once. After selecting multiple entries using the checkboxes beside each user, clicking the delete action triggers a confirmation dialog. This dialog clearly states the number of users selected and warns that the deletion is irreversible. Users can proceed by clicking Delete or cancel the action with Cancel. This bulk deletion tool is essential for efficiently managing outdated or incorrect records, especially during department cleanups or role transitions.

Figure 38.0 Super Admin Question Management Page

The Questionnaire Management page is where administrators manage the list of questions used for the Student Feedback Form (SFF). When no questions are available, the system displays a prompt encouraging users to add items using the form above. This feature is essential for customizing feedback instruments, allowing academic teams to tailor questions based on instructional goals, evaluation criteria, or campus-specific needs. Once questions are added, they populate the list for review, editing, or deletion, ensuring that the SFF remains relevant and effective for gathering student insights.

Figure 39.0 Super Admin SFF Analytics Page

The Student Feedback Analytics page provides a system-wide overview of student feedback scores across all campuses. Users can filter results by Period, Period Type (e.g., Semester System), Employment Type (e.g., All Teachers), and Ranking Order (e.g., Highest First) to customize the analysis. Once filters are applied, the dashboard displays performance data based on student responses to the SFF (Student Feedback Form). A green Export CSV button allows users to download the results for reporting or further analysis. This feature is essential for academic leaders to evaluate teaching effectiveness, identify top-performing faculty, and guide professional development initiatives.

Figure 39.0 Super Admin Supervisor Rating Analytics Pages.

The Supervisor Rating Analytics page provides a comprehensive overview of Active Learning Implementation across all campuses. Users can filter data by Period, Education Track, Modality, Campus, and Sort by Rating to customize the analysis. Key metrics such as Total Campuses, Total Observations, System Average Rating, and Rating Status (e.g., Fair) are displayed at the top for quick insights. The Campus Performance section breaks down ratings per campus and department, showing how many observations and teachers were evaluated. A Rating Guide at the bottom helps users interpret scores, categorizing them as Excellent, Good, Fair, or Needs Improvement. This dashboard is essential for academic leaders to monitor instructional quality, compare performance across locations, and identify areas for improvement.

Figure 40.0 Super Admin Settings Page

The Profile & Settings page allows administrative users to manage their account identity and security preferences. Under Profile Information, users can view their User ID, Full Name, and Admin Role, confirming their access level within the system. The Security Settings section includes a Change Password button, enabling users to update their login credentials for enhanced account protection. This page is essential for verifying administrative identity, maintaining secure access, and ensuring that system privileges are properly assigned and managed.

Figure 40.1 Super Admin Change Password

The Change Password feature in Profile & Settings page allows Super Admins to securely update their login credentials. When activated, a modal form appears with three fields: Current Password, New Password, and Confirm New Password, each with placeholder examples to guide secure formatting. After entering the required information, clicking Change Password updates the account, while Cancel exits without saving. This feature is essential for maintaining system security and ensuring that administrative access remains protected.

Login Pages

The image shows a login form titled "Super Admin Access Panel" centered on a light blue background. The form is a white rounded rectangle containing two input fields: "ID Number" with the placeholder text "Enter your ID number" and "Password" with the placeholder text "Enter your password". Below these fields is a blue "LOG IN" button. At the bottom of the form, the text "PHINMA EDUCATION" is displayed.

Figure 41.0 Super Admin Login page

The Super Admin Access Panel is the secure login gateway for system administrators. It requires users to enter their ID Number and Password to authenticate access. Once credentials are provided, clicking the LOG IN button grants entry to administrative tools and dashboards. This panel ensures that only authorized personnel can manage institutional data, settings, and analytics, maintaining the integrity and security of the entire platform.

The image shows a web page for the PHINMA Education Admin login. It features a central white box with a light gray border. Inside, the title "PHINMA Education Admin" is centered at the top. Below the title are two input fields: "ID NUMBER" with a placeholder "Enter your ID number" and "PASSWORD" with a placeholder "Enter your password" and a toggle icon. A green "LOG IN" button is positioned below the password field. At the bottom of the form, there is a "Forgot Password?" link and the text "PHINMA EDUCATION".

Figure 42.0 Admin Login page

The PHINMA Education Admin Login page is the secure entry point for users with administrative access. It features two input fields—ID Number and Password—where users must enter their credentials to authenticate. Once filled, clicking the green LOG IN button grants access to the admin dashboard and system tools. If users forget their password, the Forgot Password? link provides a recovery option. This login interface ensures that only authorized personnel can manage institutional data and settings, maintaining the platform’s integrity and security. The admin login page is used for logging in IT Department Users, Program Head Users, ALC Users, Dean Users, and HR Users

The image shows a web page titled "Student Feedback" centered within a light gray rounded rectangle. Below the title are two input fields: the first is labeled "ID NUMBER" with a placeholder "Enter your ID number", and the second is labeled "PASSWORD" with a placeholder "Enter your password". Below these fields is a solid green button with the text "LOG IN" in white. Under the button is a link that says "Forgot Password?". At the very bottom, the text "PHINMA EDUCATION" is displayed in a small, gray font.

Figure 43.0 Students Login page

The Student Feedback Login page is the secure access point for students to submit feedback about their academic experience. It includes two input fields—ID Number and Password—where students must enter their credentials to authenticate. After filling in the required information, clicking the green LOG IN button grants access to the feedback form. If login credentials are forgotten, the [Forgot Password?](#) link provides a recovery option. This interface ensures that only enrolled students can participate in the feedback process, maintaining the integrity and confidentiality of responses.

Student Pages

The screenshot shows a web page titled "Student Feedback" with a login form. At the top, there is a light gray banner with the text "PHINMA EDUCATION". Below this, the title "Student Feedback" is centered. The form consists of two input fields: "ID NUMBER" with a placeholder "Enter your ID number" and "PASSWORD" with a placeholder "Enter your password". Below these fields is a green "LOG IN" button. At the bottom of the form, there is a link "Forgot Password?" and the text "PHINMA EDUCATION".

Figure 44.0 Select Academic Period Page

The Academic Period Selection page helps students choose the correct semester for their feedback or academic activities. It clearly displays the Education Track (e.g., COLLEGE), Period Type (e.g., Semester), and a list of Available Semesters. Students simply click Continue beside their assigned period (e.g., 2024-2025-1-1) to proceed. A note below reminds users that they can change their selection later in their account settings. This step ensures that feedback and records are accurately linked to the correct academic term, making the process smooth and personalized.

PHINMA EDUCATION

Figure 45.0 Student Home Page

The Student Feedback page is designed to help students provide meaningful evaluations of their instructors and courses for the current semester. On the left side of the screen, students can view their personal details including Student ID, Name, Email, Program, Year Level, College, Campus, and the active Semester/Academic Year. This ensures that feedback is properly linked to the correct student and term. On the right side, a list of enrolled subjects is displayed automatically, each showing the Course Title, Year Level, Instructor Name, and Feedback Status. If the status is marked “Feedback”, students can click to begin evaluating that course. If it says “Closed”, the feedback window for that subject has ended. At the bottom, a section titled “Why your feedback matters” explains the importance of student input in improving teaching quality and learning environments. To use this page, students should review their course list, click on each subject labeled “Feedback,” and complete the evaluation form honestly. This process helps

instructors refine their methods and ensures that students have a voice in shaping their academic experience.

Figure 46.0 Student Logout

The Logout feature in Student Feedback interface ensures secure exit from the system once a student has completed their feedback tasks. When selected, a Logout Confirmation dialog appears asking, “Are you sure you want to logout?” with two options: Cancel to stay logged in and Confirm to proceed. This step protects student data and prevents unauthorized access, especially on shared devices. It’s a simple but essential part of maintaining account security and session integrity.
